

Tecnoally Joins EasyDMARC's MSP Program to Enhance Email Security and Deliverability for Clients

DOVER, DE, UNITED STATES, January 16, 2025 /EINPresswire.com/ --

EasyDMARC, a vendor of the cloud-native email security and deliverability platform, announced today a strategic partnership with Tecnoally, a leading managed service provider based in Singapore.

This partnership will help Tecnoally's clients protect their email domains from being used for phishing and other fraudulent activities, as well as improve their email deliverability rate.

Email security has become a significant concern for businesses of all sizes as cyberattacks, such as phishing and spoofing, are becoming increasingly sophisticated. Verizon DBIR 2021 mentions that 93% of all successful cyberattacks begin with a phishing email.

In light of this, Tecnoally has taken a proactive approach to help its clients secure their email domains and protect their sensitive information.

"Our partnership with EasyDMARC is a game-changer for Tecnoally in the cybersecurity realm. EasyDMARC is known for its top-notch email authentication services that help protect businesses from phishing and spoofing attacks. By teaming up with them as a reseller, we can offer clients an extra layer of security for their email communications," said Manoj Kurmar OK, Technical Director of Tecnoally.

"We are thrilled to welcome Tecnoally to our growing partner network. Their commitment to delivering exceptional IT services and support to their clients aligns perfectly with our mission to make email safer for everyone," said Gerasim Hovhannisyan, CEO of EasyDMARC.

The DMARC standard enables the automatic flagging and removal of receiving emails that are impersonating senders' domains. It is a crucial way to prevent outbound phishing and spoofing

attempts.

About Technoally
