

Hosted.com Enhances Free AI Domain Name Generator with Advanced Feature Set

The Advanced version of Hosted.com's AI Domain Name Generator gives unique, targeted domain ideas via custom inputs with instant availability checks.

SAN DIEGO, CA, UNITED STATES, January 15, 2025 /EINPresswire.com/ -- Hosted.com announces the advanced version of its free [AI Domain Name Generator](#). This enhanced iteration of the platform gives users even more control, giving hyper-targeted, SEO-driven domain name suggestions.

Both versions of this tool generate dozens of creative domain name ideas in seconds, incorporating proven SEO principles to help with better search engine visibility. Following that, every domain and TLD suggestion generated is instantly checked for availability, saving you time and effort in your search for the perfect domain. Having the perfect domain name to go with the best [WordPress Website hosting](#).

“

Wayne Diamond, CEO of Hosted.com, announced the Advanced AI Domain Name Generator, offering greater input control and SEO-driven suggestions to help users find perfect, brand-reflective domains.”

Wayne Diamond

Powered by advanced Artificial Intelligence (AI) algorithms, Hosted.com's Advanced Version of the AI Domain Name Generator goes beyond the Basic version by providing additional input fields designed to further refine and streamline the search and registration process. This includes allowing users to:

Fine-Tune Parameters

Users can begin by entering a description or up to 10 keywords to guide the AI. The search can be further refined by specifying the desired domain name length (short, medium, long), preferred word count (any, one, two, three), and specific words to include or exclude.

Customize Domain Suggestions

The tool also allows users to specify words to include or exclude and set preferences for domain name style, such as brandable names, short phrases, or compound words. For a focused brand approach, users can even identify a starting or ending word.

Explore Styles

Users can choose from a range of Styles to curate their ideal domain. The styles include Default, Brandable Names, Short Phrases, Alternate Spelling, Compound Words, or Real Words.

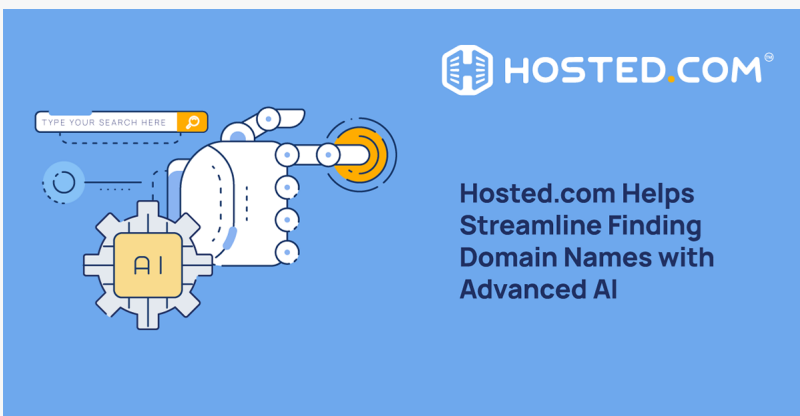

Target Industries

Powerful machine learning combined with relevant industry or category information allows for more targeted results.

“We are excited to introduce the Advanced version of our AI Domain Name Generator,” said Wayne Diamond, CEO of Hosted.com. “By offering greater control over input options and creative styles, users can find domain names that truly reflect their brand and online business by providing a wealth of creative options using focused, SEO-driven suggestions.”

The benefits of the Advanced AI Domain Name Generator include:

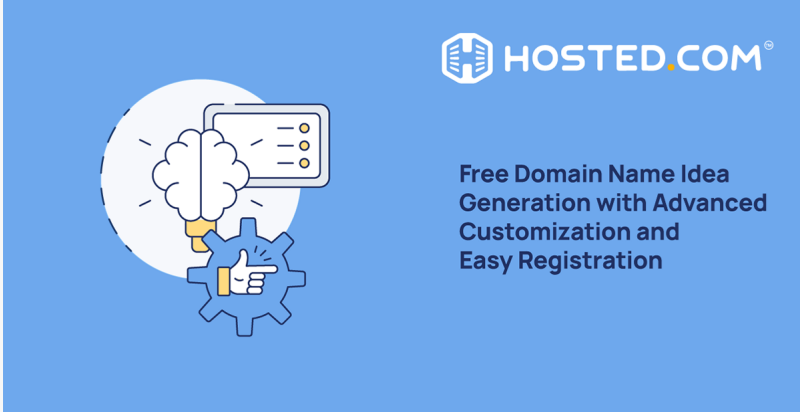

- * Optimized results to help find domain names that perfectly align with a brand identity, industry, and target audience.
- * Users can experiment with distinctive styles, word combinations, and lengths to get a wider range of creative AI-powered suggestions.
- * Save time and effort with advanced customization options and availability verification for faster decision-making.
- * Like the Basic version users get unlimited access to the Advanced AI Domain Name Generator
