

Tekleen Introduces Industry-Leading Water Filtration Technology That Saves Time, Water, and Costs

Tekleen's self-cleaning filters save water, cut costs, and boost efficiency, delivering precision filtration for industries worldwide.

LOS ANGELES, CA, UNITED STATES, January 16, 2025 /EINPresswire.com/ -- Industries are transforming how they approach water filtration, thanks to [Tekleen's](#) cutting-edge automatic self-cleaning filters. Designed to deliver unmatched performance, Tekleen is redefining filtration with precision down to 2 microns, reducing water waste, downtime, and maintenance costs for businesses across agriculture, industrial manufacturing, and municipal operations.

Tekleen Self-Cleaning Filters: A Proven Solution for Efficient Water Filtration

This innovation arrives at a critical time as industries face mounting pressure to optimize operations and meet sustainability goals. Unlike traditional sand, disc, or cartridge filters that often falter under high-demand environments, Tekleen's advanced filters complete a self-cleaning backwash in under 10 seconds — all without interrupting water flow. This efficiency has helped businesses save thousands of gallons of water annually and reduced labor costs by up to 50%.

“

Tekleen filters provide precision, reliability, and sustainability that today's industries demand, they outperform traditional systems on every front — from performance to cost-efficiency.”

Dan Flanick, VP Sales at Tekleen.

Recent Success:

- A leading agricultural company saved over 25,000 gallons of water monthly by switching to Tekleen's automatic filters.
- A manufacturing plant reduced maintenance costs by

40%, cutting system downtime by half after adopting Tekleen technology.

“Tekleen filters aren’t just a product; they’re a solution to some of the most pressing challenges industries face today,” said Dan Flanick, VP Sales at Tekleen. “Our systems are engineered to deliver reliability, precision, and sustainability, giving businesses a competitive edge.”

With flow rates ranging from 10 GPM to over 20,000 GPM, Tekleen’s filters are adaptable for small-scale operations and large industrial systems alike, making them a scalable solution for diverse applications.

About Tekleen

Tekleen is the leading provider of automatic self-cleaning water filtration systems, helping businesses worldwide improve efficiency, conserve resources, and meet modern sustainability standards.
