

Industrial Air Filters Market Demands for Technological Innovation At a CAGR of 8.3% by 2030

Industrial Air Filters Market Demands for Technological Innovation At a CAGR of 8.3% by 2030

NEW CASTLE, DE, UNITED STATES, January 16, 2025 /EINPresswire.com/ -- Industrial air filters are equipment that are used to increase the quality of air released from industries by collecting impurities and extracting industrial air. Industrial air filters are used for reducing the level of smoke, not only decreases workplace odors but also creates cleaner air, which increases protection against conditions such as asthma and cancer. Pollutants left in the air can settle on the items and contaminate food or pharmaceuticals. The right industrial air filter system removes almost all particles from the air and protects the quality of the product.

The [industrial air filter market](#) size was valued at \$5.8 billion in 2020, and is expected to reach \$12.3 billion by 2030, registering a CAGR of 8.3% from 2021 to 2030.

Drivers:

The major driving factor of industrial air filters is degradation of air quality in industries. Increase in pollution levels, owing to large manufacturing machinery and released chemicals and smoke has affected the overall air quality, which is affecting health of people on a large scale as well as degrades the quality of the products. In addition, stringent government policies for maintaining air quality drive the industrial air filter market. The governments have advised people to use portable industrial grade industrial air filter units to propel removal of pollutant particles in construction zones, manufacturing & engineering facilities, rooms with inefficient ventilations, and patient care rooms.

Rise in awareness regarding various diseases caused by polluted air and presence of bacteria and pollen is expected to propel the demand for industrial air filters, which is projected to act as a major opportunity for growth of the industrial air filter market.

Top Runners:

The major players profiled in the industrial air filter market include Ahlstrom-Munksjö, Air Filters, Inc., American Air Filter Company Inc. (Daikin Industries Ltd), Camfil, Donaldson Company, Inc., Filtration Group, Freudenberg Filtration Technologies SE & Co. KG, Lydall, Inc., MANN+HUMMEL and Parker-Hannifin Corporation. Major companies in the market have adopted product launch, business expansion and acquisition as their key developmental strategies to offer better products and services to customers in the industrial air filters market

Key Segmentation Based On:

By END-USER INDUSTRY

Food & beverage

Pharmaceutical

Chemicals & petrochemical

Electronics

Others

By APPLICATION

New system

Replacement

By Type

HEPA rated & other filter media

Ionic

Activated carbon

UV filters

By Region

North America (US, Canada, Mexico)

Europe (Germany, UK, France, Spain, rest of Europe)

Asia-Pacific (China, Japan, South Korea, India, rest of Asia-Pacific)

LAMEA (Latin America, Middle East, Africa)

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports Insights" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies, and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
