*Dr. Sam Speron Launches New Skincare Formula Featuring Vita CE and Ferulic Acid for Anti-Aging Research and Use*

CHICAGO, IL, UNITED STATES, June 10, 2025 /EINPresswire.com/ -- Dr. Sam Speron, a board-certified plastic surgeon and founder of Dr. Speron's Natural Skin Care, LLC, is pleased to announce the launch of the Vita CE with Ferulic Acid, a potent antioxidant serum formulated to combat signs of aging and enhance skin vitality.

"Incorporating effective antioxidants into daily skincare is essential for maintaining youthful, radiant skin," says Dr. Speron. "Our [Vita CE with Ferulic Acid serum](#) delivers a synergistic blend of ingredients designed to protect and rejuvenate the skin."

The Vita CE with Ferulic Acid serum features a highly potent blend of:

- L-Ascorbic Acid (15%): A pure form of Vitamin C that boosts collagen production, brightens the complexion, and provides antioxidant protection.
- Tocopherol (1%): Vitamin E that nourishes the skin and enhances the effects of Vitamin C.
- Ferulic Acid (0.5%): An antioxidant that stabilizes Vitamins C and E, enhancing their efficacy and providing additional protection against environmental damage.
- Acetyl Octapeptide-3: A peptide that helps reduce the appearance of fine lines and wrinkles by relaxing facial muscles.

This combination is intensified with a Trans-Epidermal Carrier, ensuring deep penetration and maximum effectiveness.

Clinical studies have demonstrated significant results:

- Reduction in Wrinkle Depth: Decreases wrinkle depth by 63% in 28 days.
- Enhanced Collagen Synthesis: Increases collagen production eightfold, improving skin elasticity and firmness.
- Superior Antioxidant Protection: Provides eight times the antioxidant protection, shielding the skin from environmental and UV-induced damage.

"Our serum not only addresses existing signs of aging but also offers preventive benefits by

protecting the skin against future damage," Dr. Speron explains. "It's a comprehensive solution for those seeking to maintain a youthful complexion."
