"Before the mid-1980s a paper mill in Alabama would have contained an amazing amount of asbestos. First off the building structure would have been insulated with asbestos. Additionally, the equipment or machinery in production areas would have contained asbestos. A paper mill

worker in Alabama might have had as much exposure as a steel mill or foundry worker before the mid-1980s.

"If your husband or dad has just been diagnosed with mesothelioma or lung cancer in Alabama, please call the Birmingham based lawyers at the Environmental Litigation Group at 866-714-6466. We are certain you will be glad you did."
