LONDON, GREATER LONDON, UNITED KINGDOM, January 17, 2025 /EINPresswire.com/ -- With a compound annual growth rate CAGR of XX%, the market is expected to soar from \$XX million in 2024 to \$XX million

in 2025. Such growth results from a variety of key factors, including increased approval for gene therapy products, a rise in urothelial carcinoma diagnosis and the growing demand for immunotherapy. Moreover, an increment in clinical trials and increasing healthcare expenditure also played a significant role in stimulating growth.

Moving forward, the adstiladrin market is gaining momentum and will continue to grow at forecast compound annual growth rate FCAGR of XX% in the next few years. Analysts predict it to soar to \$XX million by 2029. This forecasted growth is chiefly attributable to an increasing incidence of non-muscle-invasive bladder cancer, a rising number of BCG-unresponsive cases, increasing investment in cancer research, escalating global healthcare expenditure, and a growing preference for gene therapy.
