

Dental consumables market to surpass reach close to US\$60 billion in 2030 at a 6.56% CAGR

The dental consumables market is estimated to grow at a CAGR of 6.56% to reach a market size of US\$59.631 billion in 2030 from US\$46.654 billion in 2025.

NEW YORK, NY, UNITED STATES, January 20, 2025 /EINPresswire.com/ -- According to a new study

The demand for dental consumables rises as dental caries increase since this helps in restorative and preventive dental care coupled with advancements in dental technologies."

Analyst

published by Knowledge Sourcing Intelligence, the global dental consumables market is projected to grow at a CAGR of 6.56% between 2025 and 2030 to reach US\$59.631 billion in 2030.

Dental consumables refer to all those things, equipment, chemicals, and materials that have a single use. Clear aligners, <u>implants</u>, dental prostheses, and <u>whitening</u> <u>agents</u> among others, are examples of equipment worn by the dentist that are disposed of after use. The increasing number of people around the world who receive dental

treatment is what is most responsible for the increase in demand for clear aligners, the most frequently subscribed to procedure in dentistry. Furthermore, greater oral health awareness and the very prevalent cases of dental problems in much of the world are other factors that may push up the consumption of dental consumables throughout the forecast period.

The demand for dental consumables rises as dental caries increase since this helps in restorative and preventive dental care. For instance, in May 2024, more than half of children either have or have had a cavity in their primary teeth by the age of six or eight.

Moreover, technological developments also influence the industry. In February 2024, for example, ZimVie Inc., a major participant in life sciences relating to the spine and dental industries, introduced TSX implants to Japan, thereby extending its surgical implant portfolio. Due to no interface, the TSX Implant was specifically made to facilitate consistent loading techniques, easy removal, and quite reaching good primary stability in both types of bones, soft and dense. Developed over two decades of clinical experience, these implants were proposed as a means to promote peri-implant health, retain the crystal bone point, assure long-term osseointegration, and ensure consistent prosthetic outcomes.

Further, BioHorizons released the first line of dental implants with a deep conical connection in July 2024 with the Tapered Pro Conical implants. The Tapered Pro Conical implants are utilized to

extend the Tapered Pro series-designed macro and are equipped with a special CONELONG connection, which shall enhance surgical speed. The need for surgical interventions is mostly limited to exigent cases of implants, e.g., single tooth functions; on the other extreme of intervention, we have full arch restoration methodologies.

The global dental consumables market is segmented by product type into seven major categories: Dental prosthetics, endodontics, orthodontics, ligatures, essentials, periodontics, implants, and others. The demand for dental prostheses has been increasing in necessity with the prevalence of oral diseases and the expansion of quilt organizations. Dental prostheses are implant devices that replace the roots of lost teeth by being placed surgically into the jawbone. They are predominantly metallic, usually consisting of such biocompatible metals as titanium-in fact, the material in implants in oral surgery. They provide a rigid attachment to which prosthetic teeth like crowns or bridges can be attached. In functionality and structure, these implants imitate their natural counterparts, being a long-lasting, sturdy alternative to tooth loss far superior to improving appearance and function. ZimVie Inc., a producer of the best brands for dental implants, proposed the use of the T3 PRO-Tapered Implant, which the U.S. FDA approved. This new implant is created as a new item to be taken with the previous lines, marking another successful branded product resulting from the product development gimmick known as the T3 Tapered Implant.

The global dental consumables market by material category is segmented into metals, polymers, ceramics, and biomaterials. Titanium, gold, and stainless steel as dental implants, crowns, and orthodontic wires are highly valued because of their holding capacity, biocompatibility, and durability. The use of acrylic resin and composite resin can be seen notably in dentures, temporary crowns, and restorations, mainly due to their variety of uses and consistency in use as well as aesthetic compatibility with natural dentition.

Ceramic materials with exceptional tensile properties, hardness, and great resistance to wear, among other things, the common features of zirconia, and porcelain could be used in crowns, bridges, and veneers as they leave a cosmetic effect similar to natural enamel. Biomaterials such as bioactive glass, calcium phosphates, and collagen-based materials are applied in grafting contrary to common bone, regeneration of periodontal tissue, and formation of tissue scaffolding along with an environment to allow healing while integrating well with native tissue during restorative and regenerative dental therapies.

Based on geography, the North American region is likely to increase significantly. Many people are using implants, crowns, and bridges these days as a result of a large elderly population, increased prevalence of dental problems, and admiration for aesthetic dentistry in North America. The healthcare industry is quite mature and exposes a larger percentage of wealthy patients to various dental insurance options, contributing to the expansion of markets in this region. The application and introduction of new dental supplies and materials are driven by a very powerful dental scientific research community in North America with the presence of states

such as ceramic and biomaterials of high quality and the rise in cosmetic dentistry and preventive dentistry.

As a part of the report, the major players operating in the Global dental consumables market that have been covered are KaVo Dental, Colgate-Palmolive Company, 3M, ZimVie Inc., Procter & Gamble, Koninklijke Philips N.V., Dentsply Sirona, Institut Straumann AG, Ivoclar Vivadent, OSSTEM IMPLANT CO., LTD, and Henry Schein Orthodontics.

The market analytics report segments the Global dental consumables market as follows:

- By Product Type
- Dental Prosthetics
- o Crowns
- o Bridges
- o Three-Unit
- o Four-Unit
- Endodontics
- o Endodontic Files
- o Obturators
- o Permanent Endodontic Sealers
- Orthodontics
- Brackets
- o Fixed
- o Removable
- Ligatures
- o Elastomeric Ligatures
- o Wire Ligatures
- Essentials
- o Dental Brushes
- o Dental Floss
- o Dental Wash Solutions
- Periodontics
- o Dental Sutures
- o Dental Hemostats
- Implants
- o Root Form Dental Implants
- o Plate Form Dental Implants
- Others

- By Material
- o Metals
- o Polymers
- o Ceramics
- o Biomaterials
- By Geography
- North America
- o USA
- o Canada
- o Mexico
- · South America
- o Brazil
- o Argentina
- o Others
- Europe
- o UK
- o Germany
- o France
- o Spain
- o Italy
- o Others
- Middle East and Africa
- o Saudi Arabia
- o UAE
- o Israel
- o Others
- Asia Pacific
- o Japan
- o China
- o India
- o South Korea
- o Indonesia
- o Taiwan
- o Thailand
- o Others

Companies Profiled:

- KaVo Dental
- Colgate-Palmolive Company
- 3M
- · ZimVie Inc.

- Procter & Gamble
- · Koninklijke Philips N.V.
- · Dentsply Sirona
- Institut Straumann AG
- Ivoclar Vivadent
- OSSTEM IMPLANT CO., LTD
- Henry Schein Orthodontics

Reasons for Buying this Report:-

- Insightful Analysis: Gain detailed market insights covering major as well as emerging geographical regions, focusing on customer segments, government policies, and socio-economic factors, consumer preferences, industry verticals, other sub-segments.
- Competitive Landscape: Understand the strategic maneuvers employed by key players globally to understand possible market penetration with the correct strategy.
- Market Drivers & Future Trends: Explore the dynamic factors and pivotal market trends and how they will shape future market developments.
- Actionable Recommendations: Utilize the insights to exercise strategic decisions to uncover new business streams and revenues in a dynamic environment.
- Caters to a Wide Audience: Beneficial and cost-effective for startups, research institutions, consultants, SMEs, and large enterprises.

What do Businesses use our Reports for?

Industry and Market Insights, Opportunity Assessment, Product Demand Forecasting, Market Entry Strategy, Geographical Expansion, Capital Investment Decisions, Regulatory Framework & Implications, New Product Development, Competitive Intelligence

Report Coverage:

- Historical data from 2022 to 2024 & forecast data from 2025 to 2030
- Growth Opportunities, Challenges, Supply Chain Outlook, Regulatory Framework, Customer Behaviour, and Trend Analysis
- Competitive Positioning, Strategies, and Market Share Analysis
- Revenue Growth and Forecast Assessment of segments and regions including countries
- Company Profiling (Strategies, Products, Financial Information, and Key Developments among others)
