

Focal Segmental Glomerulosclerosis Market Predicted to See Upsurge Through 2034, Highlights DelveInsight

DelveInsight's Focal Segmental Glomerulosclerosis Market report offers an in-depth understanding of the epidemiology and market trends in the 7MM.

LAS VEGAS, NV, UNITED STATES, January 20, 2025 /EINPresswire.com/ --

DelveInsight's "Focal Segmental Glomerulosclerosis Market Insights, Epidemiology, and Market Forecast-2034" report offers an in-depth understanding of the Focal Segmental Glomerulosclerosis, historical and forecasted epidemiology as well as the Focal Segmental Glomerulosclerosis market trends in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom) and Japan.

To Know in detail about the Focal Segmental Glomerulosclerosis market outlook, drug uptake, treatment scenario and epidemiology trends, Click here; [Focal Segmental Glomerulosclerosis Market Forecast](#)

Some of the key facts of the Focal Segmental Glomerulosclerosis Market Report:

- The Focal Segmental Glomerulosclerosis market size was valued approximately USD 734 Million in 2022 and is anticipated to grow with a significant CAGR during the study period (2020-2034)
- In March 2024, ZyVersa Therapeutics, Inc. (Nasdaq: ZVSA, or \u201CZyVersa\u201D) has reached a significant milestone with the initiation of its first-in-human clinical trial for VAR 200. This trial aims to validate the promising preclinical outcomes observed across three distinct animal models of kidney disease\u2014diabetic kidney disease, focal segmental glomerulosclerosis, and Alport syndrome\u2014and determine their applicability to patients with kidney disease.
- In 2022, the US accounted for approximately 34% of the total FSGS market, with projections indicating a significant compound annual growth rate (CAGR) during the study period.

- In 2022, the EU4 countries and the UK generated an estimated USD 147 million, with this figure expected to grow at a significant CAGR. Among the European nations, France held the largest market share in 2022, followed by Germany.
- According to DelveInsight's assessments, there were roughly 55 million diagnosed prevalent cases of FSGS in the 7MM in 2022, with expectations of a rise during the forecast period.
- In 2022, around 26 million individuals in the United States were diagnosed with FSGS, and this number is projected to rise at an estimated CAGR throughout the study period from 2020 to 2034.
- In EU4 and the UK, Germany had the largest diagnosed prevalent population of FSGS in 2022, with approximately 5 million cases, followed by France and Italy. Conversely, Spain had the lowest diagnosed prevalent population in EU4 and the UK in 2022.
- Key Focal Segmental Glomerulosclerosis Companies: Traverre Therapeutics, Dimerix, Goldfinch Bio, Vertex Pharmaceuticals, GlaxoSmithKline, Dimerix Bioscience Pty Ltd, ChemoCentryx, AstraZeneca, Genentech, Inc., Sanofi, Mallinckrodt ARD LLC, ACELYRIN Inc., Kyowa Kirin Co., Ltd., Bristol-Myers Squibb, and others
- Key Focal Segmental Glomerulosclerosis Therapies: DMX-200, GFB-887, VX-147, Losmapimod, Propagermanium, RE-021 (Sparsentan), CCX140-B, Dapagliflozin, rituximab, fresolimumab, Acthar Gel, VB119, Bleselumab, Abatacept, and others
- The Focal Segmental Glomerulosclerosis epidemiology based on gender analyzed that Focal Segmental Glomerulosclerosis is more prevalent in males than females in the United States
- The Focal Segmental Glomerulosclerosis market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Focal Segmental Glomerulosclerosis pipeline products will significantly revolutionize the Focal Segmental Glomerulosclerosis market dynamics.

Focal Segmental Glomerulosclerosis Overview

Focal Segmental Glomerulosclerosis (FSGS) is a rare kidney disorder characterized by scarring (sclerosis) of some of the kidney's glomeruli, which are the small filtering units. This scarring can lead to protein leakage into the urine, kidney dysfunction, and eventually kidney failure if untreated. FSGS can be primary (idiopathic) or secondary, caused by other conditions like infections, obesity, or genetic factors. Symptoms may include swelling, high blood pressure, and foamy urine. Treatment typically involves managing symptoms and preventing further kidney damage.

Focal Segmental Glomerulosclerosis Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2020 to 2034. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed

patient pool and future trends.

Focal Segmental Glomerulosclerosis Epidemiology Segmentation:

The Focal Segmental Glomerulosclerosis market report proffers epidemiological analysis for the study period 2020–2034 in the 7MM segmented into:

- Total Prevalence of Focal Segmental Glomerulosclerosis
- Prevalent Cases of Focal Segmental Glomerulosclerosis by severity
- Gender-specific Prevalence of Focal Segmental Glomerulosclerosis
- Diagnosed Cases of Episodic and Chronic Focal Segmental Glomerulosclerosis

Focal Segmental Glomerulosclerosis Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Focal Segmental Glomerulosclerosis market or expected to get launched during the study period. The analysis covers Focal Segmental Glomerulosclerosis market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Focal Segmental Glomerulosclerosis Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

Focal Segmental Glomerulosclerosis Therapies and Key Companies

- Sparsentan: Travere Therapeutics
- DMX-200: Dimerix
- GFB-887: Goldfinch Bio
- VX-147: Vertex Pharmaceuticals
- Losmapimod: GlaxoSmithKline
- Propagermanium: Dimerix Bioscience Pty Ltd
- RE-021 (Sparsentan): Travere Therapeutics, Inc.
- CCX140-B: ChemoCentryx
- Dapagliflozin: AstraZeneca
- rituximab: Genentech, Inc.
- fresolimumab: Sanofi
- Acthar Gel: Mallinckrodt ARD LLC
- VB119: ACELYRIN Inc.
- Bleselumab: Kyowa Kirin Co., Ltd.

- Abatacept: Bristol-Myers Squibb

Focal Segmental Glomerulosclerosis Market Strengths

- The frequency of Focal Segmental Glomerulosclerosis appears to be increasing worldwide, which presents a promising opportunity for various companies to develop novel therapies
- The advent of next-generation sequencing promises to provide nephrologists with rapid and novel approaches for diagnosing and treating Focal Segmental Glomerulosclerosis
- A stratified and targeted approach is being evolved based on the underlying molecular defects

Focal Segmental Glomerulosclerosis Market Unmet Needs

- Heterogeneity in the disease presentation
- The requirement for cutting-edge diagnosis
- Restricted specific epidemiological studies
- Inadequate therapeutic options

Scope of the Focal Segmental Glomerulosclerosis Market Report

- Study Period: 2020–2034
- Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]
- Key Focal Segmental Glomerulosclerosis Companies: Travele Therapeutics, Dimerix, Goldfinch Bio, Vertex Pharmaceuticals, GlaxoSmithKline, Dimerix Bioscience Pty Ltd, ChemoCentryx, AstraZeneca, Genentech, Inc., Sanofi, Mallinckrodt ARD LLC, ACELYRIN Inc., Kyowa Kirin Co., Ltd., Bristol-Myers Squibb, and others
- Key Focal Segmental Glomerulosclerosis Therapies: DMX-200, GFB-887, VX-147, Losmapimod, Propagermanium, RE-021 (Sparsentan), CCX140-B, Dapagliflozin, rituximab, fresolimumab, Acthar Gel, VB119, Bleselumab, Abatacept, and others
- Focal Segmental Glomerulosclerosis Therapeutic Assessment: Focal Segmental Glomerulosclerosis current marketed and Focal Segmental Glomerulosclerosis emerging therapies
- Focal Segmental Glomerulosclerosis Market Dynamics: Focal Segmental Glomerulosclerosis market drivers and Focal Segmental Glomerulosclerosis market barriers
- Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies
- Focal Segmental Glomerulosclerosis Unmet Needs, KOL's views, Analyst's views, Focal Segmental Glomerulosclerosis Market Access and Reimbursement

About DelveInsight

DelveInsight is a leading Healthcare Business Consultant, and Market Research firm focused exclusively on life sciences. It supports Pharma companies by providing comprehensive end-to-end solutions to improve their performance.

It also offers Healthcare Consulting Services, which benefits in market analysis to accelerate the business growth and overcome challenges with a practical approach.
