Looking ahead, the market size of Tysabri natalizumab is projected to grow strongly from \$2,660 million in 2025 to \$3,600 million in 2029, at a CAGR of 7.9%. This anticipated growth can be traced back to an increasing prevalence of autoimmune disorders and a growing demand for effective treatments in multiple sclerosis and Crohn's disease. Other key contributing factors include advancements in biosimilars, expansion of patient access in underserved regions, and

compelling clinical research supporting Tysabri's use in multiple autoimmune conditions.

What Drives The [Tysabri natalizumab Market Growth](#)?

Of notable attention is the rise in the incidence of autoimmune disorders expected to fuel the market growth for Tysabri natalizumab. Autoimmune disorders arise when the immune system attacks the body's own cells, tissues or organs by mistake, leading to inflammation and damage, which in turn lead to chronic conditions like rheumatoid arthritis or multiple sclerosis. The growing prevalence of these disorders can be attributed to genetic predisposition, environmental triggers, and improved awareness alongside diagnosis leading to a rise in case identification. As Tysabri targets specific immune cells, it is effective in treating autoimmune disorders by preventing these targeted cells from causing inflammation and damage, thereby ameliorating conditions like multiple sclerosis and Crohn's disease.
