Purchase Your Competitive Edge Today!*

LONDON, GREATER LONDON, UNITED KINGDOM, January 22, 2025

/EINPresswire.com/ -- The [Allocord market](#) is set to grow significantly in the coming years, and this growth is fueled by various factors. The market

size has seen noticeable growth in recent years, it is expected to go from \$XX million in 2024 to \$XX million in 2025 at a compound annual growth rate CAGR of XX%. The growth in the historic period can be attributed to an increase in the prevalence of genetic disorders, a growth in awareness of cord blood transplantation, government support for stem cell therapies, improved medical infrastructure, and a rise in the incidence of severe combined immunodeficiency SCID.

A similar anticipated growth trend can be seen in the Allocord market in the next few years. It is projected to grow to \$XX million in 2029 at a compound annual growth rate CAGR of XX%. The growth in the forecast period can be attributed to increasing global healthcare access, rising demand for personalized medicine, growing donor registries, improved transplant success rates, and growing awareness and education on cord blood banking.

Moreover, the growth of the Allocord market is compounded by the rising prevalence of chronic diseases across the globe. Chronic diseases refer to a group of long-lasting health conditions that typically progress slowly and persist over time, often requiring ongoing management. These conditions, resulting from unhealthy lifestyles, socioeconomic disparities, aging populations, and urbanization affecting healthcare access, are addressed by Allocord's cord blood banking services, providing access to stem cell-based regenerative therapies and innovative treatment options. For instance, in 2024, Allergy UK revealed that over 21 million UK residents are affected by allergies, propelling the Allocord market's growth trajectory.
