What are the primary growth drivers for the Bexsero market?

The rising prevalence of meningitis is anticipated to be a significant driver propelling the growth of the Bexsero market. Meningitis, the inflammation of the protective membranes surrounding the brain and spinal cord, most commonly occurs due to an infection. Various factors have led to the increasing occurrence of meningitis such as higher infection rates, changes in vaccination coverage, weakened immunity, and improved detection and reporting systems. Bexsero helps combat meningitis by boosting the immune system to produce antibodies targeting *Neisseria meningitidis* group B bacteria, hence reducing the risk of invasive meningococcal disease.
