# EasyBilling Invoicing Software Version 9.7 Released: Enhanced Features and Streamlined Workflow

EasyBilling 9.7 released! New features include enhanced read-only mode, customizable watermarks, automated document creation, and improved macOS compatibility.

HONG KONG, HONG KONG, January 24, 2025 /EINPresswire.com/ -- EasyBilling, the comprehensive invoicing software designed to simplify document management for businesses, announces the release of version 9.7. This latest update

EasyBilling Screenshot

introduces a suite of powerful new features and significant improvements, further enhancing efficiency and productivity for users.

EasyBilling 9.7 builds upon the already robust functionality of its predecessors, offering a streamlined and intuitive experience for creating professional invoices, quotations, receipts, and more. The software automatically handles complex calculations, including tax (VAT) and totals, saving users valuable time and effort. Version 9.7 is available for a one-time purchase price of US$160.50, providing a lifetime license and backed by a 30-day money-back guarantee.

Key Enhancements in EasyBilling 9.7:
- Enhanced Read-Only Mode: Now allows for the creation and editing of documents and reports, offering greater flexibility for users.
- Enhanced Watermark Customization: Users can now set watermarks as slanted or horizontal, providing additional branding options.
- Dynamic Content Variables: Support for dynamic content variables has been added to labels, footers, notes, and other locations, enabling greater customization and automation.
- Automated Document Template Creation: A new "Auto Create" feature allows for automated template generation at customizable intervals (every nth month, every nth week, or on specific dates).
- Improved Document Title Alignment: Added alignment options for document titles in modern

and table layouts, enhancing visual appeal.

"We are thrilled to announce EasyBilling 9.7, which reflects our commitment to continuously improving and expanding the software's capabilities based on user feedback," said EasyBilling Team. "These new features significantly enhance the user experience, offering greater flexibility, automation, and customization options."

EasyBilling's core functionality remains unchanged, continuing to offer:
- Professional Document Creation: Create invoices, quotations, receipts, delivery notes, packing slips, and more with ease.
- Comprehensive Reporting: Generate monthly statements, sales reports, and payment reports for informed business decisions.
- Multi-Company Management: Manage multiple companies with independent settings and data.
- Collaborative Features: Share your database across multiple computers with a built-in locking mechanism to prevent data conflicts.
- Cross-Platform Compatibility: Works seamlessly on both Windows and macOS operating systems.
