What is driving the growth of the CNJ-016 market?

Immunodeficiency diseases, including conditions where the immune system is either compromised or absent entirely, are becoming more prevalent in our society. The causes for these diseases are myriad, ranging from genetic, environmental factors, to specific medical

conditions and treatments. CNJ-016, a vaccinia immune globulin, offers a beacon of hope for patients suffering from such conditions. It provides passive immunity and protects against potential complications arising from conditions like eczema vaccinatum, progressive vaccinia, and other vaccinia virus-related adverse events. For instance, a staggering 39.9 million people were living with HIV worldwide by 2023 according to a report by HIV.gov. Such growing trends in immunodeficiency diseases are seen as major propellers for the growth of the cnj-016 market.
