The Business Research Company

million in 2025, an impressive jump propelled by the increased adoption of biologic therapies, a surge in awareness of eye care, approval and regulatory support, a growing aging population, and strong physician recommendations. Quite notably, this historic growth points to the promising future of the Eylea HD market.

In the next few years, the eylea HD market size is projected to see significant expansion. It's anticipated to reach a valuation of \$XX million in 2029, boasting a compound

annual growth rate CAGR of XX%. This forecasted growth can be attributed to the rising prevalence of eye disorders like age-related macular degeneration diseases, growth in ophthalmic conditions, enhancements in healthcare systems, and greater awareness and early detection. Other trends influencing the market include the development of innovative drug delivery systems, advancements in combination therapies, and the integration of advanced eye testing systems in hospitals and ophthalmologic centers.

What's Driving the Growth of the Eylea HD Market?

The Eylea HD market growth is expected to be driven by the rising prevalence of eye disorders. These disorders encompass a wide array of conditions, including refractive errors, cataracts, glaucoma, macular degeneration, diabetic retinopathy, and retinal diseases, causing vision impairment or discomfort. With an aging population, increased screen time, environmental factors, genetic predisposition, and the growing incidence of chronic health conditions, the prevalence of eye disorders is on the upswing.

Eylea HD aflibercept injection 8 mg, an updated, high-dose formulation of Eylea aflibercept 2 mg, is used for treating eye disorders related to abnormal blood vessel growth or fluid leakage in the retina. One compelling instance of the increasing prevalence of eye disorders is the overall pooled prevalence of childhood myopia, according to the World Health Organization. In November 2024, the prevalence over the last 12 years up to 2022 was 5.23%, notably higher among females 4.90% than males 3.94%. Therefore, the rising prevalence of eye disorders is a key propellant for the Eylea HD market's growth.
