Dukoral Global Market Report 2025 : Market Size, Trends, And Global Forecast 2025-2034

Is the Dukoral Market Set to Witness Substantial Growth?

The [Dukoral global market](#), an oral cholera vaccine, has shown notable expansion in recent years. With an increase in Cholera cases globally fueled by poor sanitation, contaminated water, and climate change, demand for effective oral vaccines like Dukoral is rising. The [Dukoral market size](#), which was calculated at \$XX million in 2024, is projected to grow at a compound annual growth rate CAGR of XX% to \$XX million by 2025.

“

The dukoral market size is expected to see XX (FCAGR) in the next few years. It will grow to \$XX million in 2029 at a compound annual growth rate (CAGR) of XX%.”

*The Business Research
Company*

This growth has been possible due to increasing government investments in vaccination programs and public health initiatives, rising awareness of cholera prevention among travelers and local populations, and an

elevated demand for oral cholera vaccines. The market has also benefitted from the growing prevalence of antibiotic-resistant infections, increased awareness of waterborne diseases, and recurrent cholera outbreaks.

In the forecast period up until 2029, the Dukoral market size is expected to continue its steady climb, growing with a projected compound annual growth rate CAGR of XX% to \$XX. Factors credited with this anticipated growth include escalating government initiatives to bolster vaccination programs, an amplified focus on preventive healthcare, rising awareness of the necessity of cholera vaccination, and persistent demand for oral vaccines.

Technological advancements and innovative manufacturing techniques are set to revolutionize the Dukoral market. Players in this market are advancing oral vaccine formulations, enhancing the stability and shelf life of vaccines allowing for better distribution in regions with limited healthcare infrastructure. New vaccine formulations are also in the pipeline, thanks to innovations in vaccine research and development.

What Drives The [Dukoral Market Growth](#)?

The most significant growth is expected due to the rising incidence of cholera cases globally. Cholera, an acute diarrheal disease caused by ingestion of food or water infected with *Vibrio cholerae*, leads to severe dehydration and, in severe cases, death. The vaccine, Dukoral, decreases cholera cases by creating immunity against *Vibrio cholerae* bacteria and its toxin, hence reducing the chance of infection. Recent reports from the World Health Organization WHO indicate an upward trend in cholera cases. In 2023, the cases increased by 13%, with a disturbing 71% surge in fatalities compared to 2022. Therefore, this rising incidence is projected to fuel the growth of the Dukoral market.
