The [enhertu market size](#) has seen a notable compound annual growth rate HCAGR in recent years, growing from \$XX million in 2024 to \$XX million in 2025. This upwards trend can be attributed to the rising prevalence of her2-positive breast cancer, an increase in disposable incomes of people, and higher instances of breast cancer.

Looking ahead, the enhertu market size is projected to see

an impressive compound annual growth rate FCAGR over the next few years. It's predicted to hit the \$XX million mark in 2029. This growth in the forecast period is directly linked to several factors. These include improving healthcare infrastructure, substantial investments in research and development, improved treatment options contributing to market expansion, and a rising demand for oral drugs.

Equally important are the major trends propelling this growth, such as increasing drug launches, combination therapies, advancements in targeted therapies, higher indulgence of immunotherapy, focus on personalized medicine, development of biosimilars, and a growing approvals of new drugs and combination therapies.

What Drives The enhertu Market Growth?

The increasing prevalence of breast cancer also plays a significant role in enhancing the enhertu market size. This kind of cancer, which begins in the cells of the breast, has seen a rise in prevalence due to numerous factors. These include an aging population, genetic predispositions, lifestyle factors such as poor diet and lack of physical activity, environmental exposures, and improved detection and screening methods.

Enhertu, with its targeted therapy for breast cancer, delivers a potent combination of chemotherapy and HER2-targeted treatment. These drugs have shown to improve outcomes for those with advanced or metastatic HER2-positive breast cancer. According to Breast Cancer Now, a UK-based breast cancer charity, approximately 600,000 people in the UK are currently living with a breast cancer diagnosis. This number is expected to double to 1.2 million by 2030, demonstrating how the increasing prevalence of breast cancer is set to drive the enhertu market.

The market players contributing significantly in this domain include major companies like AstraZeneca Plc; Daiichi Sankyo Co. Ltd.
