Surge in demand for fuel-efficient [aircraft](#), use of lightweight carbon composites for manufacturing aircraft, and rise in number of airline passenger have boosted the growth of the global commercial aircraft market. However, surge in terrorism, congestion and delay in air traffic, and dearth of security hinder the market growth. On the contrary, rapid adoption of innovative technologies and increased demand for air travel across the globe would unlock lucrative opportunities in the future.

By application, the cargo segment is anticipated to register the highest CAGR of 5.5% from 2021 to 2030, due to rise in adoption of commercial aircraft for transporting tons of e-commerce items. However, the passenger segment held the lion's share in 2020, contributing to nearly 90% of the global commercial aircraft industry, due to high demand for commercial aircraft for air

travel by passengers.
