

TelcoBridges Announces Major Updates to its ProSBC Session Border Controller System & Resources

TelcoBridges is Making Major Investments in ProSBC to Accelerate Innovation and Improve Customer Support

MONTREAL, CANADA, January 27, 2025 /EINPresswire.com/ -- [TelcoBridges](https://www.telcobridges.com/), a leader in carrier-grade session border controller (SBC) software, today announced major investments in its ProSBC system, reinforcing the commitment to delivering a cost-effective, high performance and reliable session border controller.

With the successful integration of GR-303 compatibility into the Tmedia Gateway line last year, TelcoBridges is doubling down on ProSBC in 2025.

“We want continue providing value for our ProSBC customers,” said Maximilien Le Sieur, CEO of TelcoBridges. “Today’s announcement demonstrates our commitment to accelerating the pace of new feature development, increasing communication and transparency with customers, and providing unparalleled support to the hundreds of service providers who rely on ProSBC to meet their network needs.”

What’s new with ProSBC starting in 2025:

1. Customers will receive more features faster, thanks to a 40% increase in software development team headcount at TelcoBridges’ Montreal headquarters.
2. ProSBC version 3.3 is available now. Version 3.3 includes TLS 1.3, improved RTP performance on VMware, enhanced routing capabilities, and software transcoding for u-law and a-law codecs.
3. Customers can manage their systems with ease, thanks to the new [ProSBC documentation](#) that provides detailed instructions and screenshots on how to install, configure and troubleshoot the ProSBC.
4. ProSBC users can request access to the product roadmap. Customers who do so will have visibility into upcoming changes and can make requests or provide feedback directly to the

ProSBC is purpose-built to address the demands of VoIP, Unified Communications and Call Center solutions

5. All posts in the New [ProSBC Forum](#) are guaranteed to be answered by the TelcoBridges support team within 1-business day.
6. Increased collaboration and faster resolution of support cases, thanks to a new ticketing system.

TelcoBridges' ProSBC is a software-based session border controller, protecting networks from attack while offering extensive SIP interoperability and routing features with outstanding session handling performance. It includes B2BUA, DoS & DDoS protection and advanced call routing features. ProSBC also includes carrier-grade features such as high-availability, encryption and media manipulation

capabilities making ownership affordable through an annual subscription business model.

Growth in the SBC market is fueled by the adoption of VoIP, Unified Communications and Call Center solutions. ProSBC is purpose-built to address these demands, offering the performance, scalability and security that service providers require to thrive in this expanding market.
