

Endometrial Ablation Devices Market Growth Booming in next 10 years

PORTLAND, IL, UNITED STATES, January 27, 2025 /EINPresswire.com/ -- Endometrial ablation is a medical procedure used to remove or destroy the endometrial lining of the uterus for treatment of heavy menstrual bleeding. Factors such as increase in awareness regarding endometrial ablation, rise in prevalence of menorrhagia, and surge in demand for minimally invasive procedures are expected to boost the growth of the [endometrial ablation devices market](#) during the forecast period.

Endometrial ablation devices are used to remove the endometrium, which is the lining of the uterus. This procedure used for treatment of menorrhagia when it is not controlled with the help of medications. Increase in prevalence of menstrual disorders and rise in awareness about endometrial ablation devices majorly drive the growth of the endometrial ablation devices market. In addition, endometrial ablation offers some advantages, such as speed of treatment, efficiency, and minimal invasive procedure. These fuel the market growth globally.

Endometrial Ablation Devices Market Segmentation

The global endometrial ablation devices market is segmented based on technology type, end user, and region. Based on technology, the market is divided into radiofrequency ablation, cryoablation, hydrothermal ablation, thermal balloon, hysteroscopic ablation, and others. Based on end user, market is classified into ambulatory surgery center, clinic, and hospital. Based on region, it is analyzed across North America (U.S., Canada, and Mexico), Europe (Germany, France, UK, Italy, Spain, and rest of Europe), Asia-Pacific (China, Japan, Australia, India, and rest of Asia-Pacific), and LAMEA (Brazil, South Africa, Saudi Arabia, and rest of LAMEA).

Segment Review

Based on technology type, the endometrial ablation devices market is segmented into radiofrequency ablation, cryoablation, hydrothermal ablation, thermal balloon, hysteroscopic ablation, and others. At present, the radiofrequency ablation segment contributes for the highest market share among all technologies, and is anticipated to continue to remain dominant during the forecast period. There is an increase in the adoption of radiofrequency ablation technology in the market, due to its convenience, speed of treatment, and effectivity. On the

other side, thermal balloon technology is anticipated to show fastest growth during the forecast period primarily due to its ease of use and convenience.

Based on technology type, the market is segmented into radiofrequency ablation, cryoablation, hydrothermal ablation, thermal balloon, hysteroscopic ablation, and others. At present, the radiofrequency ablation segment generates the major share of revenue due to speed of procedure and efficiency. On the other side, thermal balloon technology segment is anticipated to show the fastest growth during the forecast period primarily owing to its safety and procedure convenience.

Based on end user, the clinic segment occupied the largest share in 2017, and is anticipated to continue its dominance during the forecast period, due to availability of portable and easy to use endometrial ablation devices. However, the ambulatory surgery center segment is anticipated to exhibit the fastest market growth during the forecast period owing to a convenient environment as well as rise in number of ambulatory surgery centers.

Asia-Pacific presents lucrative opportunities for the players operating in the endometrial ablation devices market, owing to high population base, increase in demand for minimally invasive procedures, development in healthcare infrastructure, and rise in awareness about endometrial ablation techniques. Furthermore, increase in prevalence of menorrhagia and growth in demand for advanced technologies is anticipated to fuel the market growth. In addition, rise in number of ambulatory surgical centers and increase in availability of advanced endometrial ablation devices among the clinics support the growth of the endometrial ablation devices market in Asia-Pacific.

The key players profiled in this report include AEGEA Medical, Inc., Boston Scientific Corporation, CooperSurgical Inc., Hologic, Inc., Idoman Teoranta, Minerva Surgical, Inc., Olympus Corporation, Omnitech Systems, Inc., Smith & Nephew plc. (Medtronic plc.), and Veldana Medical SA.

Key Benefits:

The study provides an in-depth analysis of the market along with the current trends and future estimations to elucidate the imminent investment pockets.

It offers a quantitative analysis from 2017 to 2024, which is expected to enable the stakeholders to capitalize on prevailing market opportunities.

Comprehensive analysis of all geographical regions is provided to determine the prevailing opportunities.

The profiles and growth strategies of key players are thoroughly analyzed to understand the

competitive outlook of the global market.

About Allied Market Research:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains. AMR offers its services across 11 industry verticals including Life Sciences, Consumer Goods, Materials & Chemicals, Construction & Manufacturing, Food & Beverages, Energy & Power, Semiconductor & Electronics, Automotive & Transportation, ICT & Media, Aerospace & Defense, and BFSI.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
