What are the key factors propelling the market growth?

The key factors propelling the market are the increasing incidences of rheumatoid and osteoarthritis, the surging demand for rehabilitation equipment, and the steep rise in the aging population. The rise in the elderly population and rise in the prevalence of musculoskeletal disorders such as osteoarthritis, rheumatoid arthritis, among others has also led to the growth of the walking assist devices market. For instance, in June 2022, according to the World Health Organization (WHO), approximately 1.75 billion people have musculoskeletal conditions worldwide. Such a huge prevalence of musculoskeletal disorders will lead to increased adoption of walking assist devices, driving the market growth.

Who are the key players in the market?

- Compass Health Brands
- Drive DeVilbiss Healthcare
- Eurovema AB
- GF Health Products, Inc.
- Human Care HC AB
- Invacare Corporation
- Rifton Equipments
- Classic Canes Limited
- CAN Mobilities Inc
- Ossenberg GmbH

The report provides a detailed analysis of these key players in the walking assist devices market. These players have adopted different strategies such as product upgrade, and product launch to increase their market share and maintain dominant shares in different regions. The report is valuable in highlighting business performance, operating segments, product portfolio, and strategic moves of market players to showcase the competitive scenario.

What is the market size and forecast of the walking assist devices market?

Based on product, the walkers segment held the highest market share in 2022, accounting for more than one-third of walking assist devices market revenue, owing to high adoption of walkers by geriatric population.

Based on age group, the geriatric segment held the highest market share in 2022, accounting for more than two-thirds of walking assist devices market revenue. This is attributed to high mobility

impairment among the geriatric population.

Based on end user, the homecare segment held the highest market share in 2022, accounting for more than two-thirds of walking assist devices market revenue. This is attributed to growing trend towards home based healthcare.

Based on region, the North America segment held the highest market share in 2022, accounting for more than one-third of walking assist devices market revenue. This is attributed to high number of knee and hip replacement surgeries being performed in this region and strong presence of key players. However, Asia-Pacific is expected to register highest CAGR during the forecast period, this is attributed to the rise in geriatric population in the region.

Key benefits of this report include:

- Enhance your strategic decision making
- Assist with your research, presentations and business plans
- Show which emerging market opportunities to focus on
- Increase your industry knowledge
- Keep you up-to-date with crucial market developments
- Allow you to develop informed growth strategies
- Build your technical insight
- Illustrate trends to exploit
- Strengthen your analysis of competitors
- Provide risk analysis, helping you avoid the pitfalls other companies could make
- Ultimately, help you to maximize profitability for your company.

Key questions answered in this report include:

- Which are the driving factors responsible for the growth of market?
- Which are the roadblock factors of this market?
- What are the new opportunities, by which market will grow in coming years?
- What are the trends of this market?
- Which are main factors responsible for new product launch?
- How big is the global & regional market in terms of revenue, sales and production?
- How far will the market grow in forecast period in terms of revenue, sales and production?
- Which region is dominating the global market and what are the market shares of each region in the overall market in 2022?
- How will each segment grow over the forecast period and how much revenue will these segments account for in 2030?
- Which region has more opportunities?
