How Hepatitis B Prevalence Propels [Hepagam B Market Growth](#)?

The continuous rise in the occurrence of Hepatitis B is slated to push forward the Hepagam B market. Hepatitis B infections, a liver infection caused by the hepatitis B virus HBV, can potentially lead to chronic disease, cirrhosis, or liver cancer. The infections like Hepatitis B are increasingly reported due to lack of cover provided by vaccination, increased transmission rates amongst the high-risk populations, and the absence of preventive measure awareness. HepaGam B is used to successfully combat this hepatitis B infection by extending passive immunity to individuals exposed to the virus.
