A security operation center is a centralized team within an organization employing people, processes, and technology to continuously monitor and improve an organization's security posture while preventing, detecting, analyzing, and responding to cyber security incidents. In addition, the growth in demand for work-from-home and remote working policies during the period of the COVID-19 pandemic aided in propelling the demand for better security and endpoint management policies, hence empowering the growth of the SOC as a service industry. However, data privacy and customization challenges of SOC as service platforms can hamper the SOC as a service market forecast. On the contrary, the development of advanced communication technologies such as 5G communication networks and cloud technology is expected to offer remunerative opportunities for the expansion of the SOC as a service industry during the

forecast period.

Rise in demand for work-from-home and remote working policies since the COVID-19 pandemic which has propelled the demand for better security and endpoint management policies, and the increasing number of cyber-attacks and fraud cases fuel the growth of the global SOC as a service market. However, data privacy and customization challenges of SOC as service platforms hinder the market growth. On the other hand, the development of advanced communication technologies such as 5G communication networks and cloud technology present new opportunities in the market in the coming years

On the basis of enterprise size, the large enterprise segment dominated the overall SOC as a service market in 2021 and is expected to continue this trend during the forecast period. This is attributed to the complex security requirements of various large corporations needing custom management solutions. However, the SMEs segment is expected to witness the highest growth owing to its growth in technological investments and surge in innovation, which is expected to further fuel the growth of the global SOC as a service industry.

Based on application area, the network security segment was the largest market in 2021,

accounting for more than one-third of the global SOC as a service market, and is likely to lead the trail throughout the forecast period. This is owing to the growing need for network security solutions globally. However, the endpoint security segment is anticipated to manifest the fastest CAGR of 11.9% during the forecast period. This is due to the growing remote working trends worldwide.

Based on enterprise size, the large enterprises segment held the largest share of three-fourths of the global SOC as a service market in 2021, and is expected to maintain a prominent growth during the forecast period, owing to the large-scale operations of SOC as a service in large enterprises. However, the SMEs segment is likely to exhibit the highest CAGR of 10.2% in 2031. This is owing to the growing innovations in SMEs.
