

# ASAP Semiconductor Proudly Announces Its Status as an Approved Supplier for GE Vernova

*ASAP Semiconductor announces its approved supplier status for GE Vernova with current hardware support in Ireland.*

ANAHEIM, CA, UNITED STATES, January 28, 2025 /EINPresswire.com/ -- ASAP Semiconductor, a California-based distributor of aerospace, aviation, defense, electronic, and industrial parts, revealed today its status as an approved supplier for [GE Vernova](#) with hardware fulfillment currently being provided to the Ireland branch. This

approval marks the beginning of a strengthened partnership between the two companies, with ASAP Semiconductor attesting that it will move forward with a steadfast commitment in supporting GE's operational requirements with its range of custom-procurement, distribution, logistics, and project management solutions.

“

We are excited to strengthen our relationship with GE Vernova, offering reliable solutions and seamless support to meet their evolving needs and business objectives.”

*Joe Faruqui*

GE Vernova is an energy equipment manufacturing and services company that was established in 2024, formed through the merger and spin-off of GE Power, GE Renewable Energy, and GE Digital. GE Vernova's primary divisions include power, wind, electrification systems, and electrification software, with its stated mission objective being to create a [sustainable electric power system](#) that tackles climate change emissions. The company is also regarded for its wind and gas turbines, attesting that such technology currently accounts for around 25% of global

electricity generation. As GE Vernova carries out operations and pursues its goals of energy innovation, its vetted suppliers will serve the important role of reliably supplying necessary goods and services.

First established in 2009, ASAP Semiconductor has emerged as a reputable distributor and custom-procurement solutions provider that operates within aerospace, civil aviation, defense, IT hardware, industrial, and electronic verticals. One of ASAP Semiconductor's notable specialties is providing access to a comprehensive inventory that reduces the need to shop on multiple platforms, the growing product range it markets across its websites covering satellites to submarines and everything between. Supporting a diverse base, the company also provides services for AOG and repair management, component leasing, inventory consignment, and more. Carrying out these operations with a customer-centric approach that prioritizes streamlined processes and tailored fulfillment, ASAP Semiconductor serves Fortune 100 companies, major air carriers, repair stations, [original equipment manufacturers \(OEMs\)](#), the United States Department of Defense, and various others.

As an approved supplier for GE Vernova, ASAP Semiconductor affirms its ability to meet high standards for quality, timeliness, and reliability in fulfilling procurement needs. These are necessary attributes when undertaking such a role, as it serves to minimize risk associated with supply chain delays and disruptions, as well promotes more consistent access to required components. This makes working with an approved supplier beneficial for many manufacturers, where ASAP Semiconductor will perform a role of leveraging its services to expedite fulfillment, reduce costs, and alleviate the complexities of procurement logistics while meeting GE Vernova's exacting specifications.

"We are very honored to be named an approved supplier as we offer support to GE Vernova," stated Joe Faruqui, CEO of ASAP Semiconductor. "It underscores our commitment in supporting the continued success of global leaders that drive industries with innovation."

Looking ahead, ASAP Semiconductor will remain dedicated to fostering productive and enduring relationships with partners like GE Vernova, ensuring they receive the highest level of service.
