The global Kineret market is currently witnessing innovations and expansions that will potentially propel its growth in the identity and access management space. Autoimmune diseases, a cluster of disorders where the body's immune system erroneously attacks its cells, organs, and tissues, are a significant concern addressed by Kineret. The increasing instance of such diseases, driven by a combination of lifestyle, environmental, and genetic factors, are subsequently supporting the market's growth. Studies are showing a worrying trend; for instance, according to the UK-based National Institute for Health and Care Research NIHR, a study in May 2023 involving 22 million people established that autoimmune disorders now afflict approximately one in ten individuals. This rise in autoimmune diseases is expected to drive the Kineret market going forward.
