

WatchMaker App Unveils 3D Features for Apple Watch Customisation

Watchmaker app launches globally, bringing 3D watch face customisation to Apple Watch with stunning designs, animations, and creative tools.

LONDON, HERTFORDSHIRE, UNITED KINGDOM, January 31, 2025 /EINPresswire.com/ -- WatchMaker App Unveils Groundbreaking 3D Features for [Apple Watch](#) Customisation

WatchMaker, the popular app known for customising [watch faces](#) on Apple Watch, has announced a major update with the introduction of innovative 3D design capabilities. This new feature allows users to create dynamic, interactive watch faces that respond to movement and user interactions, offering an enhanced level of personalisation for Apple Watch users.

The latest update is seen as a significant development in smartwatch customisation, allowing for more immersive and visually engaging watch faces. The new 3D features enable watch faces to change perspective based on the angle at which the device is viewed, adding a layer of depth and interactivity previously unavailable on the platform. Additionally, animations can now respond to user actions, creating a more tactile and engaging experience for Apple Watch owners.

"With the launch of our new 3D features, we are providing Apple Watch users with a completely new way to interact with their devices," said Emma Clarkson, Lead Designer at WatchMaker. "The introduction of depth-enhanced effects and interactive animations represents the next step in the evolution of smartwatch customisation. We're excited to see how users incorporate these new capabilities into their designs."

The 3D features are designed to be accessible to a wide range of users, from those new to customising watch faces to experienced designers. WatchMaker's updated tools allow users to easily integrate 3D elements into their designs, whether they are looking for subtle depth effects or fully animated, interactive watch faces.

Experts in the smartwatch industry believe the new capabilities could set a new standard for

customisation in the space, providing Apple Watch users with more flexibility and creative freedom in how they design their watch faces.

The update also comes with an improved user interface, designed to streamline the creation of 3D watch faces, making it easier for users to build and refine their designs. WatchMaker’s 3D designs are fully optimised for Apple Watch’s Retina display, ensuring high-quality visual performance.

The new 3D capabilities are available as part of WatchMaker's latest app update, which is free to download with additional premium features offered through in-app purchases.

About WatchMaker: WatchMaker is one of the leading apps for customising Apple Watch faces, offering a vast range of design options and features. The app enables users to create unique, personalised watch faces with ease, from simple designs to intricate, interactive animations. WatchMaker continues to evolve and expand its offerings, providing Apple Watch users with new tools and possibilities for customisation.
