

Advancing Mammography Systems: Shaping the Future of Breast Cancer Detection | CAGR 7.5%

The global mammography systems market size was valued at \$2,246.1 million in 2020, and is projected to reach \$4,718.5 million by 2030, growing at CAGR of 7.5%.

PORTLAND, OR, UNITED STATES, January 28, 2025 /EINPresswire.com/ -- Breast cancer is a major concern for women's health, with early detection being crucial for effective treatment. Mammography is currently the most common screening tool used for breast cancer detection.

Advancements in mammography systems have significantly improved the accuracy of breast cancer detection, making it easier to detect early-stage cancer and providing better treatment options. The global [mammography systems market](#) size was valued at \$2,246.1 million in 2020, and is projected to reach \$4,718.5 million by 2030, growing at CAGR of 7.5% from 2021 to 2030.

MAMMOGRAPHY SYSTEMS MARKET
OPPORTUNITIES AND FORECAST, 2020 - 2030

Mammography systems market is expected to reach **\$4.7 Billion** in 2030
Growing at a **CAGR of 7.5%** (2021-2030)

Digital mammography is now widely used in mammography systems, offering several advantages over traditional film mammography. Digital mammography uses a computer to convert X-ray images into digital images, providing clearer images that can be easily enhanced and manipulated for greater accuracy. It also reduces the need for retakes, as technicians can immediately see if the image is clear and accurate.

Major market players covered in the report, such as -

- Allengers Medical Systems Ltd,
- Fujifilm Holding Corporation,
- General Electric Company,

- Hologic Inc,
- Konica Milota Inc,
- Koninklijke Philips N.V. (Philips Healthcare),
- Metaltronica SPA,
- Planmeca OY,
- Siemens Aktiengesellschaft,
- Toshiba Corporation

Key Benefits for Stakeholders -

- The report provides quantitative analysis of market segments, current trends, strategies and potential of Mammography Systems Market research to identify potential Mammography Systems Market opportunities in genetics.
- In-depth analysis of this sector helps identify current market opportunities.
- Market analysis and information related to key drivers, restraints and opportunities are provided. • Porter's Five Forces Analysis identifies the capabilities of buyers and suppliers to enable stakeholders to make profitable business decisions and strengthen the network of buyers.
- The largest countries in each region are listed according to their contribution to the global market.
- Focusing on market players makes benchmarking easier and provides a clear understanding of the current market situation.
- The report includes regional and global Mammography Systems Market analysis, key players, market segments, application areas and Market growth strategies.

Another advancement in mammography systems is 3D mammography, also known as digital breast tomosynthesis (DBT). This technology takes multiple X-ray images of the breast from different angles, creating a 3D image of the breast tissue. This provides a clearer picture of any abnormalities and reduces the likelihood of false positives, where an abnormality is detected but turns out not to be cancerous.

Automated breast ultrasound (ABUS) is another recent development in mammography systems, particularly useful for women with dense breast tissue. ABUS uses sound waves to produce images of the breast tissue, providing additional information that may not be visible on a mammogram. This technology is non-invasive and has been shown to improve the detection of small cancers.

In conclusion, the advancements in mammography systems have significantly improved breast cancer detection, providing better treatment options and improved survival rates. Digital

mammography, 3D mammography, and automated breast ultrasound are all useful tools that can be used to complement each other and provide a more comprehensive assessment of breast health. These technological advancements show a promising future for breast cancer detection and treatment.

Frequently Asked Questions?

Q1. What are the upcoming trends of Mammography Systems Market in the world?

Q2. Which is the largest regional market for Mammography Systems?

Q3. What is the leading application of Mammography Systems Market?

Q4. What is the estimated industry size of Mammography Systems?

Q5. Which are the top companies to hold the market share in Mammography Systems?

About Us -

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various research data tables and confirms utmost accuracy in our market forecasting. Each and every us companies and this helps us in digging out market data that helps us generate accurate y data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
