

South Sound Gamma Knife at St. Joseph Welcomes Neurosurgeon Dr. Alon Orlev to Enhance Patient-Centered Care

Dr. Alon Orlev Joins South Sound Gamma Knife at St. Joseph, Bringing Neurosurgical Expertise to Enhance Innovative, Patient-Centered Care

TACOMA, WA, UNITED STATES, January 28, 2025 /EINPresswire.com/ -- South Sound Gamma Knife is proud to announce the addition of Dr. Alon Orlev to its team of highly skilled specialists. As a neurosurgeon with expertise in minimally invasive and radiosurgical techniques, Dr. Orlev brings a wealth of knowledge and experience that will further enhance the center's ability to deliver innovative, patient-centered care for complex cranial conditions.

South Sound Gamma Knife Medical Director Dr. Herbert Wang (left) welcomes Dr. Alon Orlev (right) to the team.

South Sound Gamma Knife is a leader in non-invasive radiotherapy for brain disorders, specializing in single-dose stereotactic radiosurgery. This precise treatment approach targets conditions such as brain tumors, [trigeminal neuralgia](#), and arteriovenous malformations (AVMs) with extreme accuracy, sparing healthy brain tissue and minimizing side effects. Many patients who are considered high-risk for traditional surgery due to underlying health conditions find new hope through Gamma Knife's non-invasive procedures.

“

At South Sound Gamma Knife, I aim to combine the precision of minimally invasive surgery with the transformative potential of radiosurgery”

Dr. Alon Orlev

Dr. Orlev's addition expands the center's capacity to offer comprehensive, multidisciplinary care. With a focus on

minimally invasive surgical techniques and the integration of radiosurgical treatments, Dr. Orlev ensures that patients have access to personalized care plans that optimize both outcomes and recovery. His dedication to leveraging advanced technologies aligns with the center's mission to

provide state-of-the-art treatment options tailored to each patient's unique needs.

"At South Sound Gamma Knife, I aim to combine the precision of minimally invasive surgery with the transformative potential of radiosurgery," said Dr. Orlev. "Our collaborative, team-based approach empowers patients with customized treatment strategies that prioritize outcomes and recovery."

[The Gamma Knife® system](#), a revolutionary form of radiation therapy, delivers single-dose stereotactic radiosurgery with unmatched precision. This treatment offers several benefits, including reduced recovery times, minimal cosmetic concerns, and the ability for patients to return home on the same day as their procedure. For many, this technology represents a life-changing alternative to conventional surgical methods.

Dr. Orlev's experience extends beyond his clinical expertise. A former military helicopter pilot, he honed precision, problem-solving, and focus, traits that now define his approach to neurosurgery. His commitment to fostering trust and building open, supportive relationships with patients ensures they feel confident and informed throughout their treatment journey.

The integration of Dr. Orlev's skills into South Sound Gamma Knife's offerings provides patients with an expanded range of treatment options. His ability to combine surgical and radiosurgical methods enhances the center's ability to address even the most complex cranial conditions.

About South Sound Gamma Knife

South Sound Gamma Knife is a premier provider of non-invasive radiosurgery in Tacoma, WA. Specializing in the treatment of cranial conditions, the center uses advanced Gamma Knife technology to deliver precise and effective treatment options.
