State of Hiring Solutions: Construction Industry and Metro Atlanta

According to the Deloitte 2025 Engineering and Construction Industry Outlook, "Talent shortages are likely to remain a key concern for the AEC Industry. In particular, the increase in manufacturing construction and the continued build-out of data centers and energy-specific projects could put additional pressure on the industry." Metro Atlanta ranks fourth in the US as the fastest-growing data center market according to Metro Atlanta CEO.

"This acquisition aligns with our value-driven mission to offer comprehensive and customized recruitment solutions and to elevate human potential with the responsible use of AI," said Tim Visconti, founder, Visconti Group. "We recognize the proven methodologies and track record of Onboard Talent Group to bolster our vertical integration as a premier talent pipeline provider.
