

## Carotenoids Market Set to Reach \$3,402 Million by 2032, Growing at a CAGR of 6.3% from 2022

carotenoids market size was valued at USD 1,875 Mn in 2022 and is anticipated to reach USD 3,402 Mn by 2032 at a CAGR of 6.3% during the forecast period.

NEW YORK, NY, UNITED STATES, January 29, 2025 /EINPresswire.com/ --Report Overview

<u>Carotenoids</u> are a class of naturally occurring pigments synthesized by

plants, algae, and photosynthetic bacteria. These organic pigments are responsible for the vivid red, yellow, and orange colors in many fruits and vegetables. Carotenoids are not only important for plant health but are also vital for human health as antioxidants and as a source of vitamin A.

## "

Europe is the largest market for carotenoids, with a 40% share of the global carotenoids market, and It is further expected to expand during the forecast period.

Tajammul Pangarkar

There are over 600 known types of carotenoids, including beta-carotene, lutein, and lycopene, which are commonly studied for their health benefits, such as reducing the risk of disease and enhancing immune function.

The Carotenoids Market is a segment of the dietary supplement and functional foods industry that focuses on the extraction, synthesis, and marketing of carotenoid compounds. This market has expanded significantly due to the growing consumer awareness of health and nutrition, the rising incidence of chronic diseases, and the increasing

popularity of natural colorants in the food and beverage industry.

The growth of the carotenoids market is fueled by increasing health consciousness among consumers and the rising popularity of functional foods that offer health benefits beyond basic nutrition. Research demonstrating the antioxidant properties of carotenoids and their potential

to reduce the risk of various diseases supports market growth. Additionally, the demand for natural food colorants over synthetic options continues to rise, further driving the market expansion.

The demand for carotenoids is robust in the dietary supplements market due to their health benefits, including vision protection, immune system enhancement, and potential cancer risk reduction. The aging global population and the growing consumer focus on preventative healthcare contribute significantly to the demand for carotenoid-infused products. Moreover, the food and beverage industry's need for natural coloring agents adds to the overall market demand.

Significant opportunities exist in expanding the applications of

carotenoids in nutraceuticals and pharmacological sectors. Innovations in extraction and synthesis techniques could lower costs and enhance the appeal of carotenoid products. There is also potential for growth in emerging markets where the awareness of and demand for health-enhancing ingredients are increasing.

The carotenoids market is driven by the trend towards natural products and clean labels in the food, beverage, and personal care industries. Technological advancements in extraction and processing have made carotenoids more accessible and cost-effective for producers. The increasing consumer demand for products that support health and wellness lifestyles acts as a critical driver, pushing companies to innovate and expand their range of carotenoid-based products.

## Key Takeaways

• Market Projection: The Carotenoids Market is anticipated to experience a compound annual growth rate of 6.3% between 2022 2032; the projected value in 2032 is estimated at USD 3,402

Million from current levels of USD 1,875 Million

• Astaxanthin Dominance: Of all carotenoids, astaxanthin accounts for the highest revenue share due to its potential benefits in improving heart health, immunity, and overall well-being.

• Source Analysis: Synthetic sources of carotenoids tend to dominate the market due to their ease of extraction and lower costs; however, as consumer tastes shift towards natural ingredients and natural sources grow increasingly popular among them, consumer interest in natural sources has seen significant gains.

• Application Segments: Feed is one of the highest revenue-generating industries due to rising demands for compound feed products, expanding aquaculture efforts and rising seafood consumption rates. Carotenoids play a pivotal role in improving animal health and immunity.

• Regional Dominance: Europe dominates the carotenoids market with a 40% market share globally. Major cosmetic manufacturers including Henkel, Unilever and L'Oreal contribute significantly to Europe's success as carotenoids grow their global markets.

Objectives of Report:

- Studying the size of the Carotenoids market based on the value and volume.
- Directly estimate the market shares and other important factors of the Carotenoids industry.
- Analyzing the key dynamics of the Carotenoids business.

- Discovering the important trends of the Carotenoids industry on the basis of revenue, production, and sales.

- Focus on the business value, product manufacturing, growth operator, and forecast trend.

- Studying the performance and growth of different regions and countries in the Carotenoids industry.

- Evaluate the market size and share of all segments, and regions of the industry.

Furthermore, the report includes the Carotenoids market segment types. The product type and the operation parts are considerably explained with the help of time-wise numerical and growth rates. The data is represented in tabular and pictorial formats thus enabling a clear understanding of the business layout. Regional analysis includes data for regions such as

Region of the Carotenoids market:

- North America (the United States, and Canada, Mexico)
- Europe (UK, Germany, France, Italy, and Russia)
- Asia-Pacific (Japan, Korea, India, China, and Southeast Asia)
- South America (Argentina, Colombia, and Brazil)
- The Middle East and Africa (Saudi Arabia, Nigeria, Egypt, UAE, and South Africa)

Carotenoids Market classification:

Key Market Segments

Based on Type

- Astaxanthin
- Beta-carotene
- Lutein
- Lycopene
- Canthaxanthin
- Zeaxanthin
- Other Product Types

Based on source

- Synthetic
- Natural

**Based on Application** 

- Feed
- Food & Beverages
- Dietary Supplements
- Cosmetics
- Pharmaceuticals

By Companies:

Market Key Players

- BASF SE
- Koninklijke DSM NV
- Sensient Technologies Corporation (Sensient Colors LLC)
- Divi's Laboratories Ltd. (Divi's Nutraceuticals)
- Chenguang Biotech Group Co. Ltd.
- Kemin Industries Inc.
- Lycored Corp.
- Fuji Chemical Industries Co. Ltd.
- Cyanotech Corporation
- Allied Biotech Corporation
- Alga Technologies Ltd
- Other Key Players

How the Carotenoids Market Report will prove useful:

1. The data provided will help to analyze the future prospects of the Carotenoids business.

2. Segment analysis will help in identifying the untapped opportunities of the Carotenoids industry.

3. It will help in relating the current trends that are ruling the request and how technological advancements will prove useful for further developments.

## Strategic Initiatives

— Product Portfolio Expansion: Companies are investing in R&D to develop advanced formulations that meet regulatory and consumer demands.

— Geographic Expansion: Focus on high-growth regions like Asia-Pacific and the Middle East to capitalize on industrialization trends.

 Sustainability Initiatives: Efforts to align with global sustainability goals and minimize environmental
