Pergoveris Market Report 2025 – Market Size, Trends,
And Global Forecast 2025-2034

Discover the past performance and future growth prospects of the [Pergoveris market](#). The Pergoveris market witnessed a significant historical growth rate HCAGR and is predicted to rise from its current market value of \$XX million in 2024 to \$XX million in 2025 at a compound annual growth rate CAGR of XX%. This increase over the historical period can be primarily attributed to rising infertility rates, advancements in assisted reproductive technologies, increased awareness about fertility treatments, expanding healthcare expenditure, as well as changes in lifestyle leading to delayed pregnancies.

The Pergoveris market is anticipated to continue the upward trajectory in the coming years with an expected future CAGR FCAGR of XX%. The market value is projected to reach \$XX million by 2029. The forecast period growth factors include technological innovation in fertility drugs, increasing adoption of in-vitro fertilization IVF procedures, extended healthcare coverage in emerging markets, rising cases of hormonal disorders, and escalating investment in reproductive health research.

Understanding the role of infertility in market growth: How does it influence the Pergoveris market?

As fertility becomes continually elusive, the growth of the Pergoveris market accelerates. The

term 'infertility' describes challenges associated with conception, maintenance of pregnancy, and the ability to carry to term. Infertility's prevalence is rising due to myriad reasons - delayed childbearing, lifestyle choices, environmental toxins, and an increasing frequency of medical conditions like polycystic ovary syndrome PCOS and endometriosis. Pergoveris aids infertility patients by promoting ovarian function through a unique blend of follicle-stimulating hormone FSH and luteinizing hormone LH, thereby fostering egg development in women with severe gonadotropin deficiency. Data derived from the World Health Organization in April 2023 stated that an estimated 17.5% of the global adult population, approximately 1 in 6 individuals, struggled with infertility. This rise in infertility rates serves as a major driver for the growth of the Pergoveris market.
