hepatocellular carcinoma. The increasing prevalence of chronic hepatitis C is attributed to such factors as the widespread use of injectable drugs, inadequate sterilization practices in healthcare settings, the reuse of medical equipment, and unsafe blood transfusion procedures. Pegasys copegus combination pack offers an effective treatment for chronic hepatitis C patients by leveraging the synergistic action of peginterferon alfa-2a Pegasys to boost immune response and ribavirin Copegus to inhibit viral replication, thereby enhancing viral clearance rates and improving overall treatment outcomes.
