LONDON, GREATER LONDON, UNITED KINGDOM, January 29, 2025
/EINPresswire.com/ -- How Has The [Jynneos Market](#) Performed Historically And What Is Expected In Future Years?

The Business
Research Company

The Business Research Company

The Jynneos market has seen phenomenal growth XX% HCAGR over the years. It is projected to grow from a valuation of \$XX million in 2024 to reach \$XX million in 2025, exhibiting an excellent compound annual growth rate CAGR of XX%. This growth in the historic period was primarily driven by increased recognition of growing threats from emerging infectious diseases, an increase in government funding towards vaccination programs, a surge in international travel, rise in public health campaigns, and improvements in the vaccine supply chain.

What Are The Future Projections And Major Drivers For The Jynneos Market?

Moving forward, the [market size of Jynneos](#) is expected to see another surge XX% FCAGR in the following years, growing to an impressive \$XX million by 2029 at a CAGR of XX%. The factors that will contribute to this robust growth in the forecast period include a paradigm shift towards infection prevention, personalized medicines, heightened health system preparedness for infectious diseases, solid investments in vaccine production and delivery infrastructure, and a rise in the number of immunocompromised individuals. Advanced developments in treatment options, mRNA vaccine technology, AI in vaccine development, advanced adjuvant systems, and innovative formulations are the major trends that'll shape the forecast period.

What Are The Driving Factors Behind The Rising Prevalence Of Jynneos?

One key driver fuelling the growth of the Jynneos market is the escalating prevalence of monkeypox cases worldwide. Monkeypox, a viral disease caused by the monkeypox virus from the orthopoxvirus family, has been seeing a steady rise due to increased global travel and enhanced interaction between wildlife and humans, which facilitates the fast-paced movement of infectious agents, leading to broader outbreaks.
