Based on end user, the enterprises segment held the highest market share in 2022, accounting for more than two-thirds of the global user generated content platform market and is estimated to maintain its leadership status throughout the forecast period, due to the increase in the user generated content for the promotion and marketing of the products and services. However, the individual segment is projected to manifest the highest CAGR of 34.4% from 2023 to 2032, as UGC platforms are becoming the source of revenue generation for the users.

Based on product type, the audio and video segment held the highest market share in 2022, accounting for around one-third of the global user generated content platform market, due to the popularity of the video and audio-based content on the UGC platforms. However, the social media segment is projected to manifest the highest CAGR of 36.9% from 2023 to 2032 and is estimated to maintain its leadership status throughout the forecast period, due to a rise in the number of social media platforms such as TikTok and Instagram.

Covid-19 Scenario

□ The outbreak of the Covid-19 pandemic accelerated the demand & growth of the user

generated content platform market.

□ With people spending more time at home due to lockdowns and social distancing measures, there was a significant increase in user generated content across various platforms. This led to a surge in engagement on social media platforms like Facebook, Instagram, and Twitter, which has been a positive development for businesses and content creators who rely on these platforms to reach their audiences.
