COVID-19 Scenario:

□ The outbreak of the COVID-19 pandemic had a negative impact on the growth of the global commercial robots market. Due to disruptions in the supply chain, several sectors such as manufacturing, construction, automotive were negatively impacted that affected the production and demand for commercial robots during the pandemic

□ Economic slowdown affected the setup of new commercial robots projects across the world as majority of government fundings were diverted towards construction and manufacturing sector owing to rapid spread of the COVID-19 virus, thereby impacting the market to the great extent.

□ However, the introduction of vaccines for the coronavirus disease and the re-initiation of production facilities helped the market to recover. Industries gradually resumed their regular manufacturing and services, leading to the re-initiation of companies at their full-scale capacities.
