What Is Driving the Growth of the Poultry Disinfectant Market?

The widespread occurrence of infectious livestock diseases like avian influenza and fumigatus is expected to drive the growth of the poultry disinfectants market. Diseases such as salmonella, hookworms, ringworms, psittacosis fever, and lysine disease have led to the implementation of preventive disinfection measures for livestock. To increase adoption among farmers, developed countries are mandating the use of both terminal and continuous disinfection protocols.

Disinfectants are essential in preventing the high incidence of these diseases.
