How Big Is the Global Chronic Disease Management
Market Expected to Grow, and What Is Its Annual Growth
Rate?

The [chronic disease management market size](#) is expected
to witness exponential growth in the coming years,
reaching \$24.97 billion in 2029 at a compound annual

growth rate (CAGR) of 21.8%. The projected growth can be attributed to the adoption of patient-centric care models, an aging population, increased focus on remote patient monitoring (RPM), rising prevalence of chronic diseases, and global healthcare trends. Key trends anticipated during the forecast period include responses to global health challenges and pandemics, government initiatives and policy support, the rise of consumer health apps and platforms, interoperability and health information exchange, emphasis on behavioral health, and the expansion of telehealth services.

What Is Driving the Growth of the Chronic Disease Management Market?

The growing geriatric population is a key factor driving the expansion of the chronic disease management market. Individuals aged 65 and older are more prone to chronic illnesses, leading to a higher demand for medical care and long-term support services. This increasing prevalence of chronic conditions among the elderly is fueling the need for effective chronic disease management solutions.
