

Dynex and Spectruth AI Introduce AI-Driven Solutions for PTSD Support Among Veterans in the U.S. and Ukraine

KIEV, UKRAINE, February 1, 2025 /EINPresswire.com/ -- Dynex and [Spectruth](#) AI are joining forces to introduce innovative AI-driven solutions aimed at providing crucial support for veterans and their families suffering from Post-Traumatic Stress Disorder (PTSD) in both the United States and Ukraine. This initiative seeks to enhance accessibility to mental health resources while addressing a pressing issue that affects countless individuals and society at large.

PTSD is a significant mental health challenge faced by many veterans. In the U.S., approximately 20% of veterans returning from combat zones experience PTSD, leading to a range of adverse outcomes including increased risk of homelessness and crime. A staggering 7-8% of all American adults will experience PTSD at some point in their lives, and the annual economic cost of PTSD treatment in the U.S. is estimated to exceed \$42 billion. Additionally, PTSD is linked to higher rates of homelessness among veterans, with estimates suggesting that up to 40% of homeless individuals have PTSD.

“

Our AI solutions will empower individuals to access the help they need when they need it most, ultimately saving lives and creating healthier communities.”

James Holz

In Ukraine, the ongoing conflict has compounded mental health issues among veterans and civilians. As of recent reports, it is estimated that over 300,000 veterans in Ukraine suffer from PTSD, leading to increased rates of suicide and social instability. The societal costs of

untreated PTSD in Ukraine, including healthcare, lost productivity, and homelessness, are significant challenges that require urgent attention.

Spectruth's Logo

To combat these issues, Dynex and Spectruth AI are launching a collaborative initiative that will deliver AI-powered solutions designed to provide immediate and free PTSD assessments and support. Key features of this initiative include:

AI-Powered Diagnostic Tool: The platform will utilize advanced algorithms to provide instant and accurate PTSD diagnoses, ensuring that veterans and their families receive timely support.

Accessible Resources: The initiative will focus on making mental health care easily accessible for veterans in both the U.S. and Ukraine, particularly those from underserved communities.

Support for Families: Recognizing that PTSD impacts not just veterans, but their families as well, the program will include resources and support tailored for family members who often share the burden of this condition.

Languages: Spectruth is the first to offer PTSD therapy in Ukrainian, English, and Russian.

The logo for Dynex, featuring a stylized blue and cyan geometric shape resembling a hexagon with internal lines forming a central vertical structure, set against a black background.

In addition to these features, Spectruth has launched Angel AI on Telegram, an initiative designed to diagnose PTSD and provide support through a human-like therapy experience. This AI-driven platform is being trained to offer personalized therapy sessions, enhancing accessibility and effectiveness in mental health care.

"Together with Dynex, we aim to change the landscape of mental health support for veterans and their families in both the U.S. and Ukraine," said James Holz, CEO of Spectruth. "Our AI solutions will empower individuals to access the help they need when they need it most, ultimately saving lives and creating healthier communities."

The launch of these AI solutions represents a significant step forward in addressing the urgent mental health needs of veterans. By harnessing technology, Dynex and Spectruth AI strive to make a lasting impact on reducing the economic costs associated with PTSD, improving community safety, and enhancing overall quality of life for affected individuals.
