

Top Trend In Laminated Glass Market 2025: Innovative Ultra-Lightweight Materials Transforming Market

The Business Research Company's Laminated Glass Global Market Report 2025 – Market Size, Trends, And Global Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, February 3, 2025

[/Einpresswire.com/](https://www.einpresswire.com/) -- The laminated glass market has experienced

significant growth in recent years. It is expected to rise from \$23.41 billion in 2024 to \$25.03 billion in 2025, with a compound annual growth rate (CAGR) of 6.9%. This growth in the past can be attributed to the increasing demand for value-added glass products, the need for lightweight glass to lower vehicle weight, a growing construction sector, stricter safety regulations in the automotive and building industries, and the rising adoption of strategies by major players.

Updated 2025 Market Reports Released: Trends, Forecasts to 2034 – Early Purchase Your Competitive Edge Today!

How Big Is the Global Laminated Glass Market Expected to Grow, and What Is Its Annual Growth Rate?

The laminated glass market is projected to experience significant growth in the coming years. It is expected to reach \$34.24 billion by 2029, growing at a compound annual growth rate (CAGR) of 8.1%. This growth can be attributed to increasing research and development efforts, the development of automotive glass focused on comfort,

safety, and visibility, the integration of smart glass, rising demand in emerging markets, and urbanization alongside infrastructure expansion. Key trends in the forecast period include digital printing on glass, energy-efficient glazing, biophilic design, technological innovations, and lightweight materials.

What Is Driving the Growth of the Laminated Glass Market?

The rising demand for laminated glass in the construction industry will drive the growth of the laminated glass market. As the trend of substituting cement, brick, and granite exteriors with glass in construction projects grows, the demand for laminated glass is increasing. Its properties, including strength, sound insulation, and impact resistance, are making laminated glass increasingly popular in both commercial buildings and residential homes.

Which Leading Companies Are Driving The Growth Of The [Laminated Glass Market Share](#)?

Major companies operating in the laminated glass market include Saint-Gobain S. A., Fuyao Glass Industry Group Co. Ltd., Asahi India Glass Ltd., Guardian Industries Corp., Taiwan Glass China Holding Ltd.

What Are The Key Trends Driving The Growth Of The [Laminated Glass Market Size](#)?

Leading companies in the laminated glass market are focusing on creating innovative products, such as ultra-lightweight laminated glass, to expand their customer base, boost sales, and drive revenue growth. Ultra-lightweight laminated glass is a type of laminated glass that is notably lighter, offering a significantly reduced weight compared to conventional laminated glass or other glass types.

How Is the Global Laminated Glass Market Segmented?

The laminated glass market covered in this report is segmented –

1) By Type: Polyvinyl Butyral (PVB), Sentryglas Plus (SGP), Ethylene-Vinyl Acetate (EVA), Other Types

2) By Interlayer: Polyvinyl Butyral, Ionoplast Polymer, Other Interlayer Types

3) By Applications: Building and Construction, Automotive, Electronics, Solar Panels, Other Applications

Subsegments:

1) By Polyvinyl Butyral (PVB): Standard PVB, High-Performance PVB

2) By Sentryglas Plus (SGP): Standard SGP, Customized SGP Solutions

3) By Ethylene-Vinyl Acetate (EVA): Standard EVA, High-Temperature EVA

4) By Other Types: Thermoplastic Polyurethane

Acrylic Laminates, Other Specialty Laminates

The Leading Region in the Laminated Glass Market is:

Asia-Pacific was the largest region in the laminated glass market in 2024. Asia-Pacific is expected to be the fastest-growing region in the forecast period.

What Is the Laminated Glass Market?

Laminated glass is a safety glass made by bonding two or more layers of float or tempered glass with one or more interlayers, which is then processed through autoclaving at 1400 °C and

pressures of up to 14 bars. The most commonly used interlayer in laminated glass is polyvinyl butyral (PVB), which enhances its strength and tensile safety, making it suitable for a range of industries, including construction, automotive, electronics, and solar panels.
