

# Global Calcium Peroxide Market Size, Growth, Industry Trends | Emergen Research

*The calcium peroxide market is witnessing growth due to the increasing demand for effective oxidizing agents in particularly for soil quality maintenance*

VANCOUVER, BRITISH COLUMBIA, CANADA, February 3, 2025 /EINPresswire.com/ -- The global [calcium peroxide market](#) is experiencing steady growth, with projections indicating an increase from USD 2.36 billion in 2023 to approximately USD 3.38 billion by 2033, reflecting a compound annual growth rate (CAGR) of 3.64%.

## Market Drivers

Several factors are contributing to this growth:

**Food Industry Applications:** Calcium peroxide is increasingly utilized as a dough conditioner in the baking industry, enhancing dough strength and texture.

**Environmental Applications:** Its use in environmental remediation, particularly in soil remediation and wastewater treatment, is expanding due to its effectiveness as an oxidizing agent.

**Agricultural Applications:** In agriculture, calcium peroxide is used for seed disinfection and to improve soil quality, promoting better crop yields.

## Market Challenges

Despite its benefits, the market faces challenges:

Potential Hazards: Calcium peroxide can pose hazardous effects if not handled properly, which may hinder its adoption in certain applications.

Regulatory Constraints: Stringent environmental regulations regarding chemical usage could impact the market dynamics.

Segment Insights

The market is segmented based on application:

Oxidizing Agent: This segment holds a significant share, with applications in environmental remediation and wastewater treatment.

Dough Conditioning: In the food industry, calcium peroxide is used to improve dough properties, contributing to its demand.

Seed Disinfection: In agriculture, it is applied as a seed disinfectant to promote healthy crop growth.
