

Precision Medicine Unleashed: Dr. David Vigerust on the Future of Oral Health Diagnostics

NASHVILLE, TN, UNITED STATES, February 3, 2025 /EINPresswire.com/ -- [Xraised](#), a leading platform for scientific and technological innovation, recently sat down with Dr. David Vigerust, Chief Scientific Officer at [Spectrum Solutions](#), to discuss the groundbreaking advancements revolutionizing oral health diagnostics. With over 20 years of experience in biomedical consulting and development, Dr. Vigerust and his team at Spectrum Solutions are pioneering precision medicine with cutting-edge saliva and biofluid collection technologies.

In the exclusive interview, available at Xraised, Dr. Vigerust highlights the pivotal role of the oral cavity in health assessments and disease management. Spectrum Solutions is at the forefront of developing advanced diagnostic assays that enhance disease prediction, prevention, and management. Their proprietary microarray technology is setting a new industry standard, enabling precise and efficient multi-omic analysis for both clinical and research applications.

Transforming Oral Diagnostics with Spectrum Solutions

Spectrum Solutions, a global leader in biofluid collection and diagnostic solutions, is driving innovation in oral-systemic health. Their state-of-the-art devices and assays provide an extensive panel of clinically relevant targets, offering unmatched insights for the dental and medical industries. Positive feedback from key opinion leaders underscores the impact of their technology in bridging the gap between business and life sciences.

“As a team, we are committed to developing best-in-class saliva and biofluid collection devices that redefine chronic disease and wellness diagnostics,” said Dr. Vigerust. “Our mission is to advance biotechnology and medicine through innovative solutions that improve global health.”

The Future of Oral-Systemic Health

Looking ahead, Spectrum Solutions is expanding its focus on oral-systemic health, inflammation, cardiovascular diseases, and other chronic conditions. This aligns with their ongoing mission to enhance individual well-being through groundbreaking biotechnology.
