About [City Beat News](#) and The Stirling Center

Research shows consumers value a legitimate source of information they can trust. City Beat News is there to help them find companies that will not only meet their needs but also exceed their service expectations. This builds customer loyalty, credibility and increases word of mouth. The Spectrum Award is a great indicator of future customer and patient service.

City Beat News uses its independent, proprietary research and evaluation system to gather and measure customer satisfaction data and identify businesses with a record of providing great customer service experiences. The rating system combines customer satisfaction data collected from nominations, online and other consumer reviews, customer satisfaction surveys, blogs, social networks, business-rating services, and other honors and accolades — all of which express the voice of the consumer. It brings many sources of information together into one customer satisfaction rating score for the year that shows the whole picture and avoids the pitfalls of unfounded or unjustified negative commentary posted by an unhappy employee or competitor. In its search for service excellence, City Beat News accepts nominations for companies and business professionals offering top notch service, granting the Spectrum Award to only those that earn high rankings.

The Stirling Center includes learning and resources focused on excellence. Its objective is to encourage and enable excellence across many fields wherever it can.
