

# Lana Kerr Redefines Skincare and Intimate Wellness with Non-Invasive Carboxytherapy

*Pioneering a Science-Backed Approach to Skin and Women's Health Without Needles or Downtime*

MIAMI , FL, UNITED STATES, March 5, 2025 /EINPresswire.com/ -- The beauty industry thrives on innovation, but few solutions challenge the status quo quite like carboxytherapy. Originally popularized in Europe and Brazil as an injectable, this CO<sub>2</sub>-based skin treatment has been reimaged by [Lana Kerr](#), a longtime advocate for non-invasive beauty and wellness solutions. Kerr's company, Lumisque Skincare, is at the forefront of this shift, introducing CO<sub>2</sub>Lift<sup>®</sup>, a groundbreaking topical carboxytherapy that delivers the benefits of oxygenation without needles, downtime, or invasive procedures.

s k i n c a r e

Carboxytherapy, often described as a “hyperbaric chamber for your skin,” works at the cellular level, increasing microcirculation, boosting hydration, and accelerating skin regeneration. Unlike traditional anti-aging treatments that focus on superficial improvements, CO<sub>2</sub>Lift<sup>®</sup> stimulates the body's natural repair mechanisms, addressing skin degeneration at its root.

Kerr's introduction to carboxytherapy began as a search for the next major breakthrough in skincare. Recognizing its potential beyond cosmetic use, she collaborated with medical professionals and researchers to explore its regenerative properties. The results were compelling: CO<sub>2</sub>Lift<sup>®</sup> not only rejuvenates facial skin but also promotes healing in patients with conditions ranging from diabetic wounds to post-cancer recovery.

But for Kerr, the potential of CO<sub>2</sub>Lift<sup>®</sup> extended beyond skincare. With a personal and professional commitment to women's health, she spearheaded the development of CO<sub>2</sub>Lift<sup>®</sup>V, a non-invasive, clinically tested treatment designed to restore vaginal tissue health, improve

Women's health has been deprioritized for too long. We've been conditioned to accept certain changes in our bodies as inevitable"

elasticity, and support intimate wellness—issues often overlooked in mainstream healthcare. Through double-blind studies, CO2Lift®V has demonstrated the ability to enhance vaginal hydration, support recovery post-childbirth, and address changes brought on by aging and stress.

"Women's health has been deprioritized for too long. We've been conditioned to accept certain changes in our bodies

as inevitable," says Kerr. "But we now have science-backed, non-invasive solutions that allow women to reclaim confidence, comfort, and vitality—without resorting to surgery or hormones."

By bridging the gap between medical science and beauty, Lana Kerr is not just introducing another skincare product—she's redefining the conversation around aging, self-care, and female empowerment.

#### About Lana Kerr

Lana Kerr is a wellness entrepreneur, public speaker, and bestselling author with over two decades of experience pioneering health and beauty solutions. As the founder of Lumisque Skincare, she has redefined non-invasive rejuvenation with CO2Lift®, the first clinically proven gel-based carboxytherapy. Kerr's mission extends beyond beauty—her work challenges outdated perceptions of aging and advocates for science-driven, accessible solutions that improve quality of life.
