

# Solar Photovoltaic (PV) Panel Market Growth: Efficiency, Bifacial & Thin-Film Innovations

*Solar Photovoltaic (PV) Panel Market: Clean Energy Dominance | Europe 12%+ Growing by United Kingdom, Ireland, Romania, Germany, France, Italy, Spain*

WILMINGTON, DE, UNITED STATES, February 4, 2025 /EINPresswire.com/ -- According to a new report published by Allied Market Research, The [solar photovoltaic \(PV\) panel market](#) size was valued at \$180.4 billion in 2020, and is projected to reach \$641.1 billion by 2030, growing at a CAGR of 11.9% from 2021 to 2030.

Solar photovoltaic (PV) panels are devices that convert sunlight directly into electricity using the photovoltaic effect. They are a key component of solar energy systems and play a crucial role in harnessing renewable energy.

Rise in demand for solar PV panels from residential, commercial and industrial applications and increase in government activities towards promotion of solar power drives the solar panel market growth”

In 2020, Asia-Pacific dominated the global solar PV panel market with more than 52.5% of the share, in terms of revenue.

Asia-Pacific held the dominant share in 2020, and is anticipated to maintain this dominance in solar PV panel

market during the forecast period. This is attributed to the presence of key players and huge consumer base in the region.

Europe is expected to grow at the fastest rate, registering a CAGR of 12.2%, throughout the forecast period.

The key players operating and profiled in the [solar photovoltaic \(PV\) panel industry report](#) include JA Solar, Jinko Solar, Aiko Solar, First Solar, Hanwha Solutions, Tongwei Group Co., Ltd., Shunfeng International Clean Energy Co., Ltd., Trina Solar, Yingli Solar, and Waaree Energies Ltd.

The other players operating in the value chain of the global solar PV panel industry are Risen Energy, GCL-SI, Talesun, SunPower Corporation, and ReneSola.

Rapid growth of solar energy industry is expected to drive the growth of the solar PV panel market during the forecast period.

Increase in installation of solar panels in various applications, including power generation, transportation, and water heating is anticipated to fuel the growth of the solar PV panel market during the forecast period.

Favorable government measures, including government incentives have been introduced to promote the adoption of various solar energy technologies that includes crystalline silicon and thin film.

For instance, in 2019, the U.S. government introduced solar tax credit with an objective to reduce cost of installing a solar energy system by 30.0%.

Solar panel is a device which converts sunlight into electrical energy and is made up of several semiconductor materials.

Solar panels are made by merging several solar cells in series to boost the power output compared to single solar cell. There are various types of solar panels available in the market, including crystalline silicon and thin film.

Solar panels are used in wide variety of applications for power generation that includes remote power systems, telecommunication systems, and other residential & commercial applications.

Commercial & industrial is the fastest-growing end use segment in the global [solar PV panel market size](#), expected to grow at a CAGR of 12.1% during 2021–2030.

In 2020, the crystalline silicon segment accounted for about 86.8% of the share in the global solar PV panel market, and is expected to maintain its dominance till the end of the forecast period.

In 2020, the on-grid segment accounted for 92.5% solar PV panel market share in the year 2020, and is anticipated to grow at a rate of 11.8% in terms of revenue, increasing its share in the global solar photovoltaic (PV) panel market.

### COVID-19 Impact

The global solar PV panel market witnessed gradual growth in 2020, owing to outbreak of the COVID-19 pandemic. The outbreak negatively impacted various industries and countries, thereby decreasing manpower across the globe, which, in turn, decreased consumer spending and thus, decreased the demand for various key products including solar panels.

In Europe, economies, such as Germany, France, Spain, and Italy, followed stringent measures, such as social distancing and limiting movements, to prevent the spread of coronavirus.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
