

ATWT Completes Construction on Highly Anticipated Eden Village of Tulsa

Birch Company Instrumental in Building Modern Community for the Homeless

TULSA, OK, UNITED STATES, February 4, 2025 /EINPresswire.com/ -- Birch Company (OTC: 'ATWT'), the operating subsidiary of ATWEC Technologies, Inc. (the 'Company'), today announced its successful project completion at Eden Village of Tulsa. The gated, tiny home community is specially designed to provide permanent homes and a built-in support system for chronically homeless individuals.

Newly built Eden Village sits on 17 acres near downtown Tulsa, and has 63 tiny homes, a community center, greenhouse and small farm, geared to provide permanent homes and comfortable living for the vulnerable and disadvantaged, including elderly, disabled, and homeless citizens. The community is an entity of Eden Village of Tulsa, Inc., a non-profit 501(c)(3), and provides discounted rent and services for its new residents. People can go to <https://edenvillagetulsa.org/about-us/> to see the layout and the story behind the community.

Birch Company was engaged as one of the initial contractors on the project, and began work in early 2024. The Company has just completed construction on its final home and has now built a total of nine (9) high-quality homes in the community and will soon be paid by the non-profit through donations and state and federal subsidized funding.

Homelessness in America is an existential crisis, with record-high numbers of people forced to live without a place to call home. Shelters are reporting a surge in people seeking help, and the number of people forced to live outside of shelters is also rising. Factors contributed to the crisis include rising housing costs, natural disasters, and an influx of migrants. In 2023, a reported 653,104 people were homeless in the US.

The Eden Village project has been a Tulsa community sensation and has been chronicled in the local newspapers and television stations, including channel 2 and channel 6.

Brad Johnson, founder and CEO of Eden Village of Tulsa, said he and his team have faced many roadblocks since purchasing the land two years ago. Despite this, he says making it through all those trials only made them better focused for the next 54 homes. "We've really pushed hard to make this happen because we know the needs are huge out there." Johnson also said they've

had no shortage of interest. "We've had over 400 applications without even asking for it, from people who are desperate for housing," the founder said. "We need more of these communities to begin to truly solve the problem of homelessness in America."

ATWT CEO Angus Martin was visibly excited about the project milestone, and proud of the Company's contribution to the new community. "It's an honor to be a part of Eden Village, and we take pride in the craftsmanship of these homes. Although they are so-called 'tiny', they have modern amenities, and are classy and comfortable, and we encourage people to take a tour to see for themselves. It has truly been a community effort. The fact that we are helping needy and homeless people makes it that much more fulfilling, where 'no one sleeps outside. We look forward to being a part of future Eden Villages across the country and eventually building thousands of homes."

Shareholders and other investors can find the disclosure related to Birch Company's remarkable construction of its Eden Village Tulsa's tiny homes on the OTC Markets website, as well as the Company's website, www.thebirchco.com.
