Smoked bacon and ham market was valued at \$13.9 billion in 2020, and is estimated to reach \$20.9 billion by 2030, growing at a CAGR of 4.47% from 2021 to 2030.

WILMINGTON, DE, UNITED STATES, February 4, 2025 /EINPresswire.com/ --

Smoked bacon and ham are prepared by transforming the pork meat or its by-products by fermentation, salting, smoking, curing, and other processes in order to enhance the taste and

extend the shelf life of the meat product. Pork meat are generally processed and various processed meat products include ham, bacon, sausages, hot dogs, and pepperoni. Different preservatives and additives such as sodium nitrite, sodium nitrate, spices, and sodium phosphate are used in processing of bacon and ham that adds flavor and reduces the growth of microorganisms which prevents the spoilage of food.

The [smoked bacon and ham market](#) is gaining traction in the global markets due to the growing preference of convenience foods among the population along with the tasty and nutritional food in their hectic schedule. Rising disposable income, changing lifestyle of the consumers, increasing adoption of westernization in the food, and rapid growth in urban population are expected to foster the growth of smoked bacon and ham market size during the forecast period.

The hectic and busy lifestyle of the working professionals, especially the working youth population, wants to spend less time for cooking. Hence, they prefer ready-to-cook and ready-to-eat food products that can fulfill their nutritional needs. Smoked bacon and ham serve this need and saves their time. This is a major factor propelling the growth of the global smoked bacon and ham industry. The increasing penetration of quick service restaurants chains, hotels, fast

Smoked Bacon and Ham Market

casual restaurants, cloud kitchens, and cafes has led to the growth of the processed meat market in the North America and Europe, which in turn fueling the smoked bacon and ham market growth. According to the data published by the Centers for Disease Control and Prevention (CDC), around 36.6% of adults in U.S. consumes fast food on regular basis. Hence, the fast-food chains and emerging retail industry are contributing towards the growth in the consumption of smoked bacon and ham in the developed markets like North America and Europe. The rapid growth and penetration of these fast-food chains in Asia-Pacific and LAMEA is expected to boost the demand for these products in the forthcoming years and hence providing lucrative growth opportunities to the players operating in the market.
