## What's Driving The Growth In The Nucala Market?

The increasing prevalence of asthma worldwide is likely to fuel the growth of the nucala market moving forward. Asthma, a chronic respiratory condition, causes airway inflammation and narrowing. Symptoms such as wheezing, coughing, chest tightness, and shortness of breath are often triggered by allergens or physical activity. The rise in asthma cases is ascribed to factors like environmental pollution, allergens, changes in lifestyle, urbanization, and genetic predisposition. Nucala works by targeting and inhibiting interleukin-5 IL-5, a protein crucial to the growth and activation of eosinophils, which are white blood cells that contribute to airway inflammation in asthma. This reduces symptoms and the frequency of asthma exacerbations, making it a promising treatment option.
