India IVF Trends 2025

□□□□□-□□ □□□□□□ □□□□□□□□□□-

- The COVID-19 pandemic significantly impacted the India in-vitro fertilization (IVF) services market owing to shutdowns in various COVID-19 affected countries and rise in number of healthcare workers falling ill in the pandemic.
- However, the market is growing post-pandemic period owing to an increase in infertility cases, and furthermore, a growing number of fertility clinics is anticipated to drive the market growth during the forecast period.

Growing incidence of male and female infertility, emerging trend of late pregnancies, technological advancements in ART procedures, surge in IVF success rates, and rise in disposable income in India drive the growth of the India in vitro fertilization market. However, significant cost associated with IVF treatment impede the market growth. Moreover, growing number of fertility clinics and growth opportunities in emerging markets are expected to boost the market growth in future.
