

# Key Market Driver in Oralair Industry 2025: Rising Prevalence Of Allergic Conditions Driving Market Growth

*The Business Research Company's Oralair Global Market Report 2025 – Market Size, Trends, And Forecast 2025-2034*

LONDON, GREATER LONDON, UNITED KINGDOM, February 6, 2025

[/EINPresswire.com/](https://www.einpresswire.com/) -- The size of the oralair market has been expanding significantly over recent years. It is

anticipated to grow from \$XX million in 2024 to \$XX million in 2025, equating to a compound annual growth rate CAGR of XX%. The growth in the historic period can be attributed to factors such as the increasing prevalence of conjunctivitis, growing awareness about allergen immunotherapy, rising levels of air pollution, surging urbanization and industrialization, and the burgeoning adoption of oralair in emerging markets.

Updated 2025 Market Reports Released: Trends, Forecasts to 2034 – Early Purchase Your Competitive Edge Today! ”

*The Business Research Company*

Will there be any considerable change in the oralair market size in the coming years?

The oralair market, intrigued by the increasing prevalence of allergic conditions, escalating demand for therapeutics, a surge in the patient population, growing healthcare services demand, and increasing environmental pollution, is expected to witness XX FCAGR in the next few years. It is anticipated to expand to \$XX million in 2029 at a

compound annual growth rate CAGR of XX%.

What will primarily drive the growth of the oralair market in the subsequent years?

The rising prevalence of allergic conditions is expected to be the primary growth driver of the oralair market. Allergic conditions are immune system responses to allergens that trigger symptoms such as itching, swelling, and inflammation. Increased air pollution, environmental changes, and genetic predispositions largely fuel the prevalence of allergic conditions.

Oralair works by desensitizing the immune system to allergens like grass pollen gradually,

decreasing sensitivity over time, alleviating symptoms, and providing long-term relief from allergic reactions. For instance, according to the American Lung Association, in 2022, approximately 1 in 3 U.S. adults and more than 1 in 4 children reported having at least one allergic condition - including seasonal allergies, eczema, or food allergies in 2021. With this rising prevalence of allergic conditions, the growth of the oralair market seems promising.
