Besides, the market is anticipated to see XX FCAGR in the next few years, reaching \$XX million by 2029 at a CAGR of XX%.

The increasing prevalence of respiratory diseases is expected to propel the growth of the pulmotech MAA market going forward. But what's triggering this surge in respiratory diseases?

Respiratory diseases encompass a broad range of conditions that affect the lungs and other parts of the

respiratory system, including the airways, lungs, and respiratory muscles. These conditions can be driven by various factors such as environmental pollutants, lifestyle habits, aging populations, and advancements in diagnostic methods. Pulmotech MAA plays a significant role in the diagnosis and management of these chronic respiratory conditions by aiding in pulmonary imaging to assess regional lung function and detect potential abnormalities such as perfusion deficits. For instance, in June 2024, approximately 8.5 million people in Australia, or 34% of the population, were estimated to have chronic respiratory conditions, according to the Australian Institute of Health and Welfare. This further includes an estimated 2.8 million people living with asthma and 638,000 people living with chronic obstructive pulmonary disease COPD. Therefore, the increasing prevalence of respiratory diseases is undoubtedly a major driving force behind

the pulmotech MAA market.
